# RECORD OF PROCEEDINGS WORK SESSION MEETING AGENDA OF THE TOWN COUNCIL OF THE TOWN OF FRISCO APRIL 23, 2019 4:00PM

Agenda Item #1: Water Rates Discussion 4:00pm

Agenda Item #2: 100% Renewable Electricity Plan Presentation 5:00pm

Agenda Item #3: Dockless Bikes Discussion 5:30pm

RECORD OF PROCEEDINGS
REGULAR MEETING AGENDA OF THE
TOWN COUNCIL OF THE TOWN OF FRISCO
APRIL 23, 2019
7:00PM

### STARTING TIMES INDICATED FOR AGENDA ITEMS ARE ESTIMATES ONLY AND MAY CHANGE

### Call to Order:

Gary Wilkinson, Mayor

#### Roll Call:

Gary Wilkinson, Jessica Burley, Daniel Fallon, Rick Ihnken, Hunter Mortensen, Deborah Shaner, and Melissa Sherburne

#### **Public Comments:**

Citizens making comments during Public Comments or Public Hearings should state their names and addresses for the record, be topic-specific, and limit comments to no longer than three minutes.

NO COUNCIL ACTION IS TAKEN ON PUBLIC COMMENTS. COUNCIL WILL TAKE ALL COMMENTS UNDER ADVISEMENT AND IF A COUNCIL RESPONSE IS APPROPRIATE THE INDIVIDUAL MAKING THE COMMENT WILL RECEIVE A FORMAL RESPONSE FROM THE TOWN AT A LATER DATE.

### **Mayor and Council Comments:**

#### **Staff Updates:**

#### **Consent Agenda:**

- Minutes April 9, 2019 Meeting
- Warrant List
- Purchasing Cards
- GOCO Grant Support Letter for the GAP Project Underpass

#### **New Business:**

Agenda Item #1: New Fermented Malt Beverage License - Vitamin Cottage Natural Food Markets Inc dba Natural Grocers STAFF: DEBORAH WOHLMUTH 1) MAYOR OPENS PUBLIC HEARING 2) STAFF REPORT 3) PUBLIC COMMENTS 4) MAYOR CLOSES PUBLIC HEARING 5) COUNCIL DISCUSSION 6) MOTION MADE 7) MOTION SECONDED 8) DISCUSSION ON MOTION 9) QUESTION CALLED

Agenda Item #2: Resolution 19-18, Adopting Community Climate Action Plan: Strategies for a Sustainable Future STAFF: JOYCE ALLGAIER 1) MAYOR OPENS PUBLIC HEARING 2) STAFF REPORT 3) PUBLIC COMMENTS 4) MAYOR CLOSES PUBLIC HEARING 5) COUNCIL DISCUSSION 6) MOTION MADE 7) MOTION SECONDED 8) DISCUSSION ON MOTION 9) QUESTION CALLED

#### Adjourn:

#### MEMORANDUM

P.O. Box 4100 ◆ Frisco, Colorado 80443

To: MAYOR AND TOWN COUNCIL

FROM: BONNIE MOINET, FINANCE DIRECTOR

RE: WATER RATE STUDY DISCUSSION

DATE: APRIL 23, 2019

**Background:** The Town last completed a water study in May of 2006, effective in January 2007. This study covered a ten year period beginning in 2007 and remained in effect through 2016. Rates have remained unchanged for over two years. In 2018, Council directed staff to conduct a new five year study and the results of that study are presented for your consideration.

<u>Analysis:</u> At the last water rate discussion, Council indicated they would like to see alternative structures with more tiers and more information regarding direct impacts to users. The attachments with this memo include 6 alternatives, 3 with usage included in the quarterly fee and 3 with no usage included. Various tier and rate structures are offered for all alternatives. Each alternative projects a 5% annual increase.

As you know, Town of Frisco tap fees are significantly lower at \$4,301 than other entities within the County. These proposed alternatives reflect a 10% annual increase for 5 years, at which time tap fees would be \$6,925, which is more comparable to our neighboring communities.

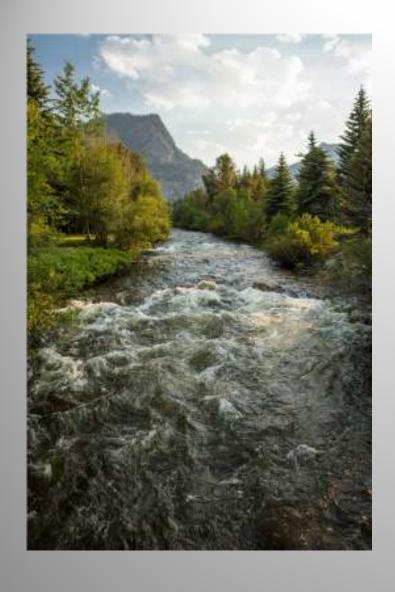

Additionally, recent events with the water system and adoption of the Water Efficiency Plan have led to significant increases in capital projects and conservation programs since the preparation of the 2019 budget. The attached analysis of existing and proposed water rates reflect these increases.

<u>Staff Recommendation:</u> Alternatives 1, 3 or 5 change the Town's rate structure wherein no usage is included in the base quarterly fee. Choosing one of these options guarantees a steady, sustainable stream of income based on the number of EQRs. This makes it easier for Council to budget for ongoing operations, conservation programs and capital projects.

Staff analyzed various sample types of users to determine impacts under these various alternatives. Based on the results of this analysis, staff recommends alternative 7 because it has the least impact of these three alternatives on users. This alternative also has multiple rate tiers and promotes conservation. Please refer to the attached analysis.

<u>Financial Impact:</u> The attached analysis also shows the effect on the Water Fund's fund balance at the end of 5 years. Clearly, the alternatives offering no usage with the quarterly service fee generate revenues that preserve a healthy fund balance and ones that would most likely protect the water system, should costly expenditures arise in the future. Should Coucil choose to implement the water rates and structure of alternative 3, the fund balance in the Water Fund would be nearly \$5.8 million.

Reviews and Approvals: This report has been reviewed and approved by: Bonnie Moinet, Finance Director Nancy Kerry, Town Manager

Water Rate Discussion

April 23, 2019 Worksession

## **Discussion Topics**

- Purpose of Water Rate Review
- Review Historical Water Rates, Usage, and Rate Comparison to Other Agencies
- Funding Water Conservation Programs
- Funding Capital Investment Projects
- Options for Proposed Water Rate Increase

## Purpose of Water Rate Review

## Water Rate Revenue Usages

- Keep up with rising operating expenses
- Fund capital improvements without need for borrowing
- Fund conservation programs
- Maintain fund balance
- Encourage conservation

# Historical Water Rates, Water Usage and Rate Comparison

## 2006 Water Rate Study & Change

- Previous water rate study completed by Boyle Engineering in May 2006
- Rate study covered a ten year period beginning in 2007 and remained in effect through 2016
- Council adopted the following rate structure on 9/12/06, effective January 2007:
  - 3% annual increase in EQR
  - Quarterly base rate: 1-18,000 gallons
  - Tier 1: 18.001-35000 gallons
  - Tier 2: 35001+ gallons

### <u>Current Rates Resulting from the 2006/07 Water Rate Changes:</u>

## **Historical Water Usage**

### # Customers within Rate Structures

Total # Customers: 2027

Usage	# Customers
1-18,000/qtr	1,082
1-16,000/qtr	1,011
1-12,000/qtr	839
1-8,000/qtr	609

# Funding Water Conservation Programs

### **Conservation Incentives**

- Four Water Conservation Programs are Proposed:
  - 1. Old meter replacement.
  - 2. Slow The Flow Program.\*
  - 3. Water Smart Program.\*
  - 4. Start At the Tap Program.\*

<sup>\*</sup>Note: Some estimated water usage savings shown on the following pages is based on participation levels, which will be refined as the programs progress.

# **Conservation Program: 1. Meter Replacement**

Old Meter Replacement: \$150,000 (2020)
(As outlined in section 8.1.2 of the Town of Frisco Water Efficiency Plan)

Estimated usage savings: 3-5 acre feet / year.

Replace remaining old analog meters with new AMR meters. There are approx. 150 of these old meters remaining in the system.

New meters can then be integrated into the fixed base read system as well as the Water Smart program.

# Conservation Program 2. Slow the Flow

Slow the Flow Program: \$10,000 (2020-2024)

(As outlined in section 8.2.2 of the Town of Frisco Water Efficiency Plan)

Estimated usage savings: Approx. 10 acre feet/yr.

This program will provide irrigation system audits to all customers that request them. Slow the Flow will identify leaks and in-efficiencies in irrigation systems and provide customers the knowledge needed to fix these issues.

# Conservation Program 3. Water Smart

Water Smart Program: \$10,000/yr (2020-2024)

(As outlined in section 8.1.1 of the Town of Frisco Water Efficiency Plan)

Estimated usage savings: 5 acre-feet / year.

This incentive will allow customers to see their detailed usage in real time and allow them to compare their use to similar type customers. This system will also give customers pointers on how they can conserve water, thus reducing their costs.

# Conservation Incentives 4. Start at the Tap

Start at the Tap: \$300,000/year (2020-2024)
(As outlined in section 8.2.1 of the Town of Frisco Water Efficiency Plan)

Estimated usage savings: 6-8 acre-feet / year.

- <u>Toilets:</u> Replacing 1 toilet from 1980-1994 to a current Water Sense standard 1.28 gal/flush will have a 16,000 gal/yr savings.
- Other Fixtures: Rebate program for the purchase of Water Sense (EPA) fixtures to help reduce lead & copper exposure by replacing old leaded fixtures. Program would be limited to homes meeting the age criteria for lead/copper exposure.
- 1,361 residential construction starts between 1980-1994.
- Capital Cost Note: The Town may be required to install a treatment technique for the Lead &
  Copper Rule. Engineers are studying the issue to determine the most cost effective method
  and if necessary, there may be a budgetary impact in the 2020 budget.

# Funding Capital Investment Projects

# Capital Improvement Projects 2020-2023

The following CIP are recommended as priority projects in the Water Division:

- Abandon Wells 1&2: \$150,000 in 2020.
- Relocate Fire Hydrant for Gap Project: \$35,000 in 2020
- New Fire Hydrant and Valve at N 10 Mile and Dam Rd.: \$50,000 in 2020
- Water Main Leak Survey. 1/3 of system each year: 15,000 / year-ongoing
- Replace filter modules on skid A: \$150,000 in 2021
- Abandon Well #4: \$150,000 in 2021
- River Pines Water Main Replacement \$750,000 in 2021
- Replace Filter Modules on Skid B: \$150,000 in 2022
- Replace Chlorine Gas w/ Hypochlorite at Well #6: \$300,000 in 2022
- Creekside Water Main Replacement: \$1,000,000 in 2022
- Replace Chlorine Gas w/ Hypochlorite at Well #5: \$300,000 in 2023
- Exterior Repairs On Above Ground Storage Tanks: \$400,000 in 2023
- Hawn Drive Water Main Replacement: \$500,000 in 2023

# Options for Proposed Water Rate Increase

- Retain current rate structure
- No incentive programs
- Additional capital costs
- Unable to cover required capital projects

- Service fee increased to \$45/qtr; 5%/year increase
- No water usage covered by service fee
- − Tier 1 − 1-16,000 − 5%/year increase in rate
- − Tier 2 − 16,001-25,000 − 5%/year increase in rate
- Tier 3 25,001+ 5%/year increase in rate
- 10%/year increase in tap fees
- Incentive programs
- Additional capital costs

- Service fee increased to \$45/qtr; 5%/year increase
- Service fee covers 1-16,000 gallons
- Tier 1 16,001-25,000 5%/year increase in rate
- Tier 2 25,001 & over 5%/year increase in rate
- 10%/year increase in tap fees
- Incentive programs
- Additional capital costs

- Service fee increased to \$45/qtr; 5%/year increase
- No water usage covered by service fee
- Tier 1 1-8,000 5%/year increase in rate
- Tier 2 8,001-16,000 5%/year increase in rate
- Tier 3 16,001-50,000 5%/year increase in rate
- Tier 4 50,001+ 5%/year increase in rate
- 10%/year increase in tap fees
- Incentive programs
- Additional capital costs

- Service fee increased to \$45/qtr; increase 5%/year
- Service fee covers 1-8,000 gallons
- Tier 1 8,001-16,000 5%/year increase in rate
- Tier 2 16,001-50,000 5%/year increase in rate
- Tier 3 50,001+ 5%/year increase in rate
- 10%/year increase in tap fees
- Incentive programs
- Additional capital costs

- Service fee increase to \$45/qtr; 5%/year increase
- No usage included in service fee
- Tier 1 − 1-12,000 gallons − 5% increase/year
- Tier 2 12,001-24,000 5% increase/year
- Tier 3 24,001-50,000 5% increase/year
- − Tier 4 − 50,000+ 5% increase/year
- 10%/year increase in tap fees
- Incentive programs
- Additional capital costs

- Service fee increase to \$45/qtr; 5%/year increase
- Service fee covers usage of 1-12,000 gallons
- Tier 1 − 1-12,000 gallons − 5% increase/year
- Tier 2 12,001-24,000 5% increase/year
- Tier 3 24,001-50,000 5% increase/year
- − Tier 4 − 50,000+ 5% increase/year
- 10%/year increase in tap fees
- Incentive programs
- Additional capital costs

## **Tap Fee Increases**

- Tap Fees currently \$4,301
- Proposed 10%/year increase:

<u>Year</u>	<u>Amount</u>
2019	\$4,730
2020	\$5,203
2021	\$5,723
2022	\$6,296
2023	\$6,925

## **Summary**

- Water Rates are proposed to be increased to allow for the following:
- Keep up with rising operating expenses
- Fund conservation programs
- Fund capital improvements
- Maintain fund balance
- Encourage conservation
- Staff recommends: Alternative 3

## Conclusion

- Council's Decision Making Framework:
  - 1. Do the conservation programs, and capital improvement projects meet with the Town Council's vision? A: Council's determination.
  - 2. Are there policies in place or polices needed to implement the programs and/or projects? A: TC would need to adopt the policies to implement the programs.
  - 3. Costs as compared to both financial and societal benefits have been discussed throughout.
- An increase in the water rates would allow the Town to implement conservation programs and capital projects in alignment with WEP as well as the Council's Vision and Strategic Priorities of Sustainable Environment and Quality Core Services.

#### **MEMORANDUM**

P.O. Box 4100 ◆ Frisco, Colorado 80443

To: MAYOR AND TOWN COUNCIL

FROM: DIANE MCBRIDE, ASSISTANT TOWN MANAGER

RE: 100% RENEWABLE ENERGY PLAN PRESENTATION

DATE: APRIL 23, 2019

<u>Summary</u>: The 100% Renewable Energy (RE) task force for Frisco, led by Fran Long, Frisco Resident and retired engineer with Xcel Energy, formed in December 2018, and has been working on a plan to help Frisco procure all electricity from 100% renewable resources by 2035.

At the Town Council work session, Mr. Long and members of the task force will present the 100% RE draft plan and roadmap. The request for Town Council is to commit the Town to go 100% RE by the following dates:

- Town Facilities by 2025
- Residents and Businesses by 2035

To achieve these goals, the task force is recommending the following actions:

- Town Council approving the 100% RE Resolution. This resolution will be drafted in response to the feedback from the work session and scheduled for adoption in May, 2019; and
- Working with Xcel Energy to implement the 100% RE plan; and
- Leading by example by addressing Town of Frisco facilities first

<u>Background</u>: On November 27, 2018, Mr. Long presented to the Frisco Town Council, "Frisco: Moving Towards 100% Renewable Electricity". Mr. Long presented a roadmap illustrating the path towards Frisco achieving 100% renewable electricity. Following this presentation and per Council's direction and support, Mr. Long formed a renewable energy task force to draft a plan to achieve the goal of 100% renewable electricity for Frisco. This plan will be reviewed with the Town Council at the April 23<sup>rd</sup> work session.

On March 12, 2019, Jess Hoover, Climate Action Director with HC3, presented an overview of the Summit Community Climate Action Plan (CAP) to Town Council, including a specific focus on the CAP's carbon reduction goals and implementation strategies. One of the sections within the CAP is the "Renewable Energy Sector", with the goal to reduce emissions from electricity use 100% by 2035. The 100% RE task force is directly tackling this goal within the CAP with a plan and a roadmap for success for Frisco.

<u>Staff Analysis</u>: Obtaining 100% RE is a three-pronged approach. It consists of 1) all Town facilities participating in Xcel Energy's renewable energy programs, 2) approaching high electricity use customers for participation in RE programs, and 3) encouraging residential and small business customers to participate by implementing a marketing campaign to entice the community to participate in Xcel Energy's release of the next round of RE programs.

Staff has been actively engaged in the 100% RE task force with Mr. Long and community members since December 2018. The first part of the 100% RE plan commits the Town to lead by example by committing Town facilities to 100% RE by 2025. Through Xcel's renewable connect program, 45% of the Town facilities are already at 100% RE. Staff is working with Xcel Energy on an energy audit at this time for all Town facilities. As a result of this audit, dollars will need to be allocated to implement energy efficiencies for all Town facilities. These dollar amounts are not known at this time but are estimated to be ~\$25k-\$50k/year over the next several years.

The next commitment for 100% RE comes from Frisco residents and businesses. HC3 and staff will need to work together with the large and small businesses and Frisco residents to achieve this goal by 2035. Dollars for public outreach and education will need to be allocated to the program at a later date. A percentage of business and residential customers will need to commit to participate in solar gardens and/or Xcel's renewable connect program. To achieve the 100% RE goal, not all businesses or residents need to commit to the program.

**Recommendation:** Staff recommends the Town Council use this work session as an opportunity to gain a further understanding of the roadmap and plan for Frisco to achieve the goal of 100% RE. If supported, a resolution will be drafted by staff and the RE task force and scheduled for Town Council adoption in May 2019.

Financial Impact: There are costs associated with the 100% RE plan however the costs will not be fully vetted until the results of the energy audit on all Town facilities is complete. This audit should be completed by June 2019. The task force estimates future costs of ~\$25k-\$50k/year over the next several years to implement energy efficiencies on all Town facilities.

A public outreach and education campaign will need to be developed in future years to target the businesses and residents of Frisco. Costs are estimated to be ~\$15k/year for such efforts.

An additional potential cost is solar. Paying upfront for rooftop solar will have an associated cost that is not fully known at this time.

In the 2019 budget, Town Council allocated \$25,000 toward the implementation of the Climate Action Plan through the assistance of HC3. Staff will continue to work together, with HC3, with Xcel Energy, and with the 100% RE task force to allocate funds appropriately for such implementation.

**Reviews and Approvals:** This report has been reviewed and approved by:

Nancy Kerry, Town Manager – Approved as to content; contingent upon Council direction for implementation and budget.

Bonnie Moinet, Finance Director: Approved contingent upon Council approval of future budgets as costs are identified.

Frisco Plan for 100% Renewable Energy - DRAFT

<u>Introduction</u>: The Town of Frisco is evaluating the possibility of moving the Town to 100% renewable electricity in the near future. In a previous council meeting (11/27/18), the Town Council asked the author, Mr. Fran Long, to assemble a team and develop a plan to move the Town to 100% renewable electricity. The team was established with the involvement of several Town of Frisco staff members.

As with all the communities in Summit County and with Summit County as a whole, the Town has limited means and legal hurdles to accomplish this task without the help of the energy provider in the county – Xcel Energy. We strongly recommend this task be accomplished in partnership with the utility.

Not only will be a much easier path forward, but Xcel Energy is at 28% carbon free electricity now, has committed to 55% by 2026, and 100% carbon free electricity by 2050. This, in conjunction with Frisco's efforts, will enable the town to obtain their goals in the near future

This paper describes practical steps that can be taken within Town facilities and in the community to build momentum and achieve 100% renewable electricity in the near future. These tasks tailor well with some of the pilot programs Xcel Energy has put in place with other committed communities.

<u>Town of Frisco Proposed Renewable Electricity Goal</u>: Separate Town electric use by Town facilities and community wide, and lead by example – adopt a shorter-term goal for town facilities, followed by a goal for the community at a later date.

The team has decided on the following goals:

- Town facilities to reach 100% renewable electricity by 2025
- Community wide to reach 100% renewable electricity by 2035

One concern the Town of Breckenridge had when adopting a renewable energy goal was committing future town councils to meet possibly unobtainable goals. This concern was addressed by providing an off-ramp if unforeseen circumstances did occur that prevented future town councils from obtaining the goals. This off-ramp, if Frisco chooses to invoke, will be underlined in the Frisco Resolution Document.

It may also be helpful if the Town facilities can meet their goal without reliance on Xcel Energy's renewable energy mix at the time. This will help ease the burden on the rest of the town by reducing the amount of energy that needs to be reached by a group of people with possibly incohesive goals.

<u>High-level Plan To Obtain Town Goals</u>: The following is a summary of the proposed plan for the Town to reach its renewable energy goals.

# Steps outside of Xcel Energy

- 1. Adopt policies and standards that encourage energy efficiency and renewable electricity
  - a. Building codes for EE and RE
  - b. Streamline permitting process for rooftop solar
- 2. Work with large electricity use customers for participation in renewable energy programs

# Steps in partnership with Xcel Energy

- 1. Baselining
  - a. Frisco provided with more information about XE's regulatory and resource planning processes and requirements, XE to understand how Frisco views thee processes and how they relate to Frisco's priorities and objectives
  - b. Understand annual energy use for both Town facilities and the community
  - c. Develop a baseline REC accounting mechanism, taking advantage of Xcel's clean energy mix
- 2. Increase community's energy efficiency (EE) with existing Xcel programs
  - a. Detailed overview of energy efficiency programs
  - b. Xcel Energy to perform energy audits on all town buildings (in process)
  - c. Jointly develop energy reduction goal
  - d. Town facilities to implement high value EE measures
- 3. Energy and carbon emissions reduction goals existing programs
  - a. Deep dive into Xcel's existing RE programs with apples to apples comparisons with possible conversations with developers
  - b. Review community energy use for program participation and take advantage of existing renewable energy programs
  - c. Policy coordination for changes in Xcel Energy RE mix
- 4. Pathway to 100% RE
  - a. Identify a realistic path for the community to reach their 100% RE goal
    - i. Incorporate Xcel's additional incorporation of RE
    - ii. Expand existing RE programs to allow community customers to participate in additive renewable programs
  - b. Analysis of the community's electric demand both for town facilities and community-wide usage
  - c. Draft a list of potential actions that could be taken to move the community to 100% clean energy
  - d. Explore energy design and code assistance
- 5. Solar gardens in Summit and adjacent counties
  - a. Explore opportunities in Summit county with land holding entities such as forest service, private land and ski resorts
  - b. Collaborate with other EFC partnership towns in adjacent counties including interconnection capacity in those counties

- 6. Marketing effort for the community
  - a. Work with the larger businesses in town to enhance renewable energy program participation
  - b. Educate the community on renewable energy programs
  - c. Entice community participation in the programs

Xcel Energy may ask the town to explore additional areas of opportunity such as energy storage and electrification of vehicles, electric hot water heating, etc.

The energy efficiency measures, although not considered renewable energy, help reduce the amount of renewable energy needed to meet town goals. Updating or adopting new permitting processes and building codes, along with ongoing energy efficiency projects, will help stem the increase in energy use as the town grows while reducing the costs of adding renewable energy projects in the community.

<u>Three-pronged Approach</u>: Obtaining 100% renewable energy is a three-pronged approach. It consists of all town facilities participating in Xcel Energy's renewable energy programs, work with high electricity use customers for participation in RE programs, and encouraging residential and small business customers to participate in Xcel Energy's release of the next round of RE programs.

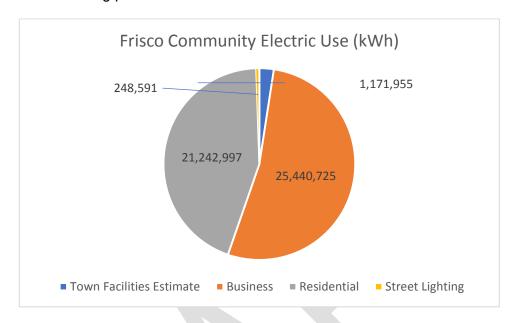

Town Facilities to 100% RE

Work with high-use businesses

Raise awareness and entice residents and smaller businesses

It may be worthwhile approaching Xcel Energy and HC3 to have a co-marketing plan for the marketing campaign mentioned previously. For example, the Summit Daily and HC3 and/or Frisco websites could be utilized to help educate the town on which Xcel Energy renewable energy program is best for them. This would be accomplished in conjunction with the next round of Renewable\*Connect and future releases of Solar Gardens in the area.

<u>Town of Frisco Community Electric Use</u>: The community's electricity use comprises of the Town facilities, business customers, residential customers and a small potion for street lighting as shown in the following plot.

<u>Current Renewable Electricity Participation</u>: The community of Frisco is participating in several of Xcel Energy's renewable energy programs. The total renewable energy participation to date is 1,279,161kWh, which is 2.7% of community electric use. The breakdowns by use segments show above are as follows:

	Windsource	On- Site Solar*Rewards	Renewable *Connect	Solar Gardens	Total RE
Town Facilities			525,548		525,548
Business	116,077	42,130		43,391	201,598
Residential	387,790	9,844	141,033	13,348	552,015
Total:	503,867	51,974	666,581	56,740	1,279,161

The renewable energy participation for the Town facilities is 44.8% of their use, residential customers are at 2.6% of their use, followed by business customers are at 0.8%. These participation percentages are an indication of how easy, or hard it will be to get the different energy use segments to participate in renewable energy programs. The Town facilities are controlled by a coherent group whereas the residential and business customers are a more diverse group with varying onions on climate change and other mitigating circumstances such as willing building tenants and landlords that have many factors to consider before agreeing to participate in renewable energy programs.

Larger use customers, such as Walmart, Safeway, Natural Grocers and Whole Foods, might be an easier sell than residents or small businesses. They are a more cohesive group and several already have in place national plans to go green. This is why a three-pronged approach mentioned above could be the easiest way to get to 100% renewable energy for the company.

<u>Xcel Energy Renewable Electricity Generation Mix</u>: Xcel Energy is at 28% renewable energy in their generation mix today. They have Public Utility Commission (PUC) approval to obtain 55% renewable energy in their generation mix by 2026 and they have recently announced that they plan on converting to 100% carbon free energy generation by 2050. As part of the ramp up to 100% carbon free energy, Xcel plans on being 80% carbon free by 2030.

It is this combination of Xcel Energy's carbon free energy and the three-pronged approach that enables the community of Frisco to reach their renewable energy goals. When 2030 arrives, the community needs to obtain 20% renewable energy to meet the 100% community-wide goal of 100% renewable energy.

One may have noticed that Xcel Energy will be at 80% carbon free energy by 2030, so why not move our 100% goal from 2035 to 2030? An astute observation, but the additional time may be needed to get the required participation of the community in renewable energy programs to the levels required in the tactical plan.

What Is Required To Meet The 100% Renewable Energy Goal: As stated above, Xcel Energy will hit 80% carbon free energy by 2030. This still leaves the community to convert 20% of their electricity use to renewable energy. In the next section, a tactical plan was developed to show how this can be accomplished. The participation levels by the different electricity use among the community segments are described in the table below.

Community Electric Customers	kWh Use	RE Participation	Customers Needed
Town Facilities Estimate	1,171,955	1,171,955	All
Business	25,440,725	5,173,090	100-136
Residential	21,242,997	3,275,809	285-489
Street Lighting	248,591	In XE RE mix	
T. (.1.			

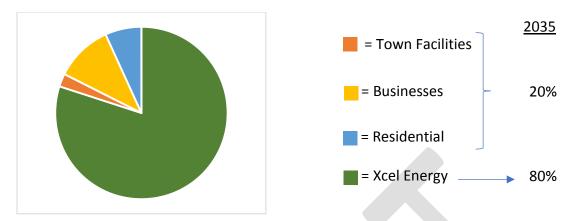

Totals 48,104,268 9,620,854 <== 20%

<u>A Tactical Plan</u>: This is one plan of several possibilities that we believe will get the Town of Frisco and community to 100% renewable electricity by the stated dates. The plan requires The Town of Frisco facilities to convert 100% of their use to renewable energy, large and small businesses need to convert up to 20% of their electric use to renewable electricity (100-136 participants), followed by the residents converting up to 15% of their electric use, which is 285-489 residents. Although the town does not need 100% participation by all residents and businesses, obtaining the numbers mentioned above will not be a walk in the park.

The tactical plan uses Xcel Energy's new and existing renewable energy programs and relies on the utility reaching their stated 80% renewable energy mix by 2030. The remaining 20%, or 9,620,854 kWh, will be obtained following the renewable energy participation listed below.

	Now	2026	2030
Town Facilities			
Existing Participation in RE programs	525,548		
Participate in 16% of future solar garden		646,408	
Businesses			
Existing participation in RE programs	201,598		
Participation in 20% solar garden		786,001	
8% of Businesses participate in R*C		2,035,258	
Participation in 20% of another solar garden			786,001
Residential			
Residential participation in RE programs	552,015		
Residential participation in 20% Solar garden		786,001	
2.7% of Residential participation in R*C		573,561	
Enhanced or new XE RE efforts for Bus & Res			2,728,462
	1,279,161	4,827,229	3,514,463
		Total RE	9,620,854

The Renewable Energy participation by electric use segment can be seen in the chart below.

## Costs:

<u>Solar</u> - **\$0** investment and dollar savings for participating in Xcel Energy Renewable Energy programs (unless Town decides to pay upfront for rooftop solar). It is highly recommended the town not pay upfront and find a developer that can take advantage of the 30% investment tax credit. This will reduce costs and budgetary concerns.

<u>Energy Efficiency</u> - **Investment is required** for any additional energy efficiency implementations. The town of Frisco facilities underwent and energy audit by EMC back in 2009 and the town has been working diligently to implement the measures listed in the plan. The Town of Frisco facilities also enrolled every building in Xcel Energy's free energy audit. The investment required would be to implement any acceptable ROI energy efficiency measures as a result of the free audits.

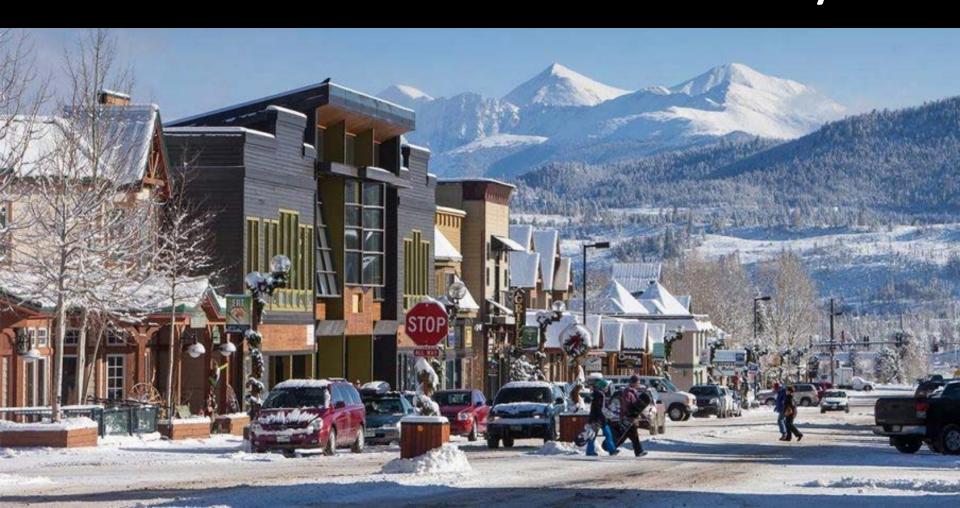

The work that needs to be done will not be known until the audits are complete, however any significant energy efficiency measures could cost in the **ballpark of \$25-50K/yr**.

Breckenridge is spending \$100K/year in energy efficiency programs in 2018 and 2019.

#### Possible Co-Marketing - Possible co-marketing efforts (up to \$15K/campaign)

- Work with large use customers (Walmart, etc.)
- Work with Xcel Energy for a marketing effort prior to next releases of their RE programs
- Possibly with HC3 to push their aggregated rooftop solar purchase

# Frisco: Moving Towards 100% Renewable Electricity

# Our request

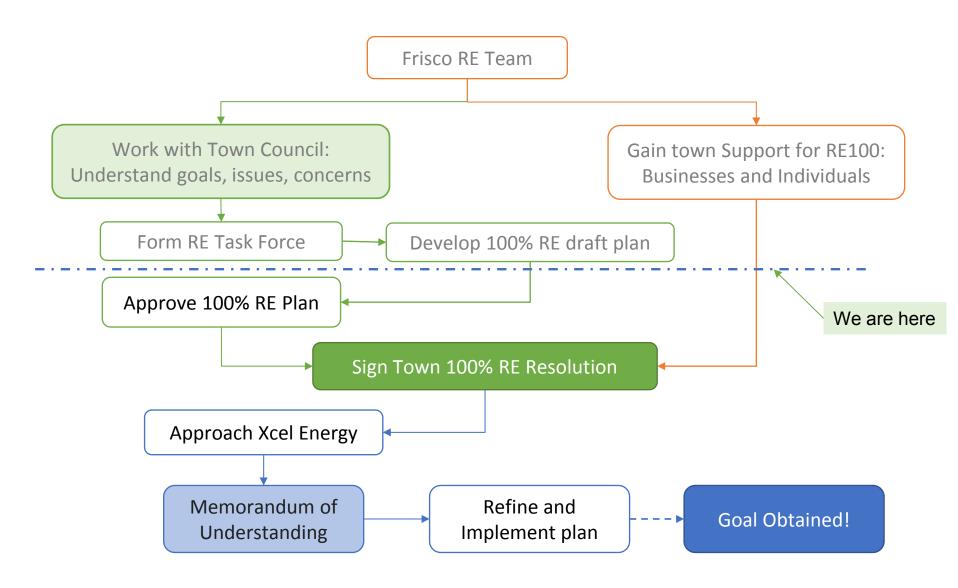

# The town Council to commit the town to go 100% renewable electricity by the following dates:

Town facilities by	2025
Frisco Community by	2035

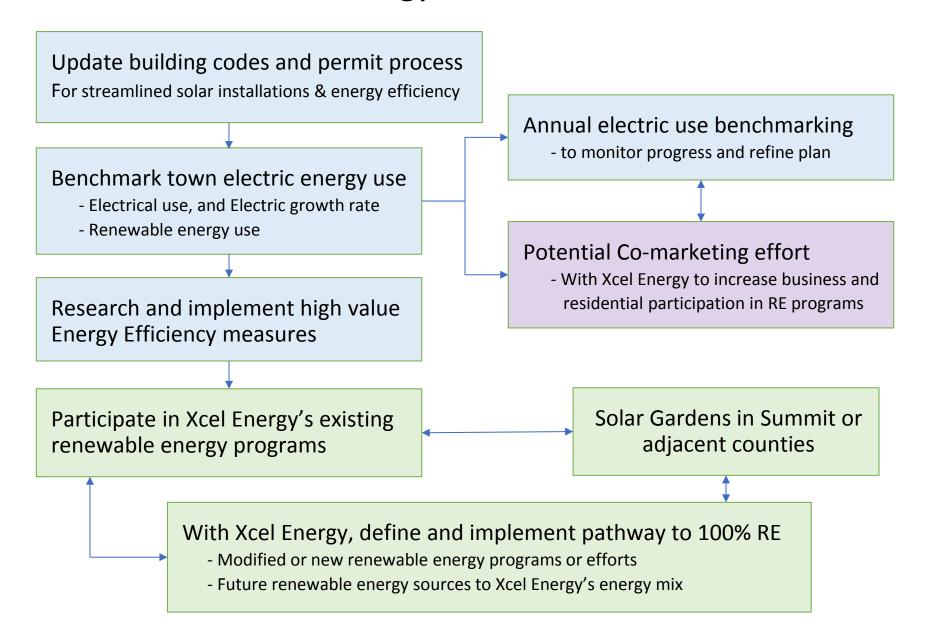

# By

Voting for committing the town to 100% RE Signing the 100% RE resolution
Work with Xcel Energy to implement
Town facilities to lead by example

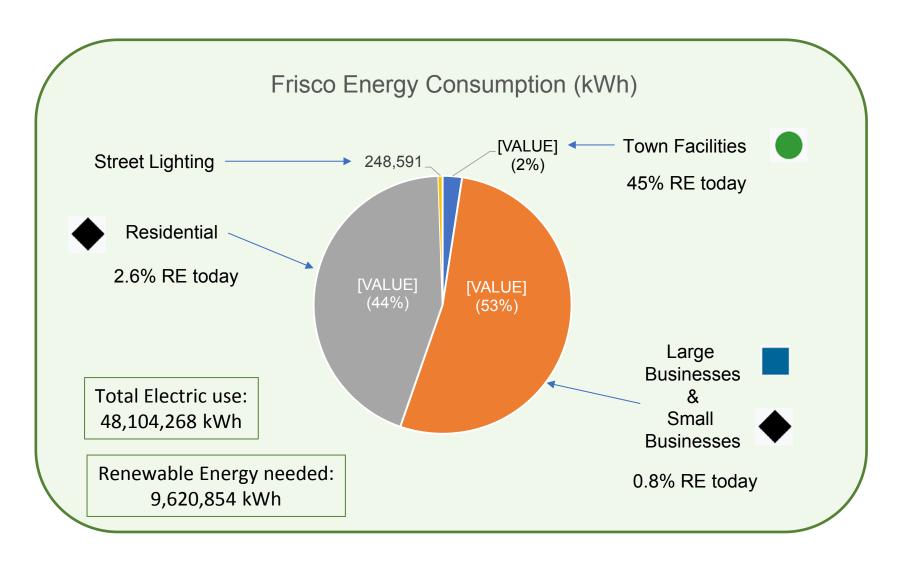

# How do we get to RE100?

# 100% Renewable Energy Plan

# Today's Look...

# Recommended Path

# **Town Facilities**

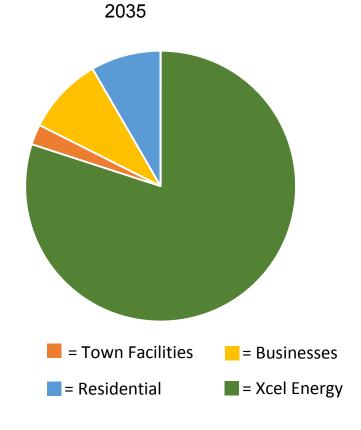

Participate in a solar garden or Renewable Connect

# **Business customers:**

Participate in 2 solar gardens 8% of Business customers in Renewable Connect

# **Residential customers:**

Participate in a solar garden ~3% of Business customers in Renewable Connect

# **Customer Participation Needed:**

Town Facilities	All facilities
<b>Business customers</b>	100-136
Residential customers	285-489

# **Potential Costs**

# Solar:

**\$0** investment and dollar savings for participating in Xcel Energy Renewable Energy programs (unless Town decides to pay upfront for rooftop solar (ITC issue))

# **Energy Efficiency:**

**Investment required** for any additional energy efficiency implementations

- Breck spending \$100K/year in EE improvements for 2018 and 2019

# **Possible Co-marketing:**

Possible co-marketing efforts (~\$15K/campaign)

- Approach large use customers (WalMart, etc.)
- With Xcel Energy for educational and marketing effort prior to next releases of their RE programs
- Possibly with HC3 to push their aggregated rooftop solar purchase

# Next Steps...

# Short term

- Follow Town Council to sign resolution, committing to 100% RE goals
- Contact and work with Xcel Energy to refine and implement plan (see workflow on slide 2)

# Thank-you!

#### **MEMORANDUM**

**TO:** Town of Frisco Mayor and Councilors

Nancy Kerry, Town Manager

**FROM:** Thad Renaud, Town Attorney

**DATE:** April 23, 2019

**RE:** Potential Regulation of E-Scooters and E-Bikes (also known as "Dockless

**Mobility Devices"**)

# INTRODUCTION

&

# **QUESTIONS PRESENTED**

Local governments across the country are experiencing the increased integration of new technology platforms into their transportation systems. One area where this growth is moving at a rapid pace is the deployment of what has been referred to as "dockless mobility devices," such as bicycles, including electric and electric-assisted bicycles, and electric scooters.

For clarity, in this context, an "electric scooter" means a stand-up, electric-powered scooter with two tandem wheels designed to transport only one person, as opposed to a traditional, sit-down motorized "scooter." Also for clarity in this context, a "dockless" device means a device without a structure at a permanent, fixed location from which shared devices may be deployed for use by the public.

Generally, dockless mobility devices are being deployed under a shared-use system that provides users (customers) the ability to access the device via mobile technology that allows the customer to pick up the device at one location (any location at which it may be found) and leave it at any other location within a system's service area.

While dockless mobility offers opportunities to provide transportation alternatives that reduce congestion and help local governments meet goals of reduction in greenhouse gas emissions, these new technologies are challenging to regulate since they often do not fit neatly into existing ordinances and laws. They can also pose safety risks to users and the general public, and thus it is important that local governments carefully consider whether and how to regulate them.

The goal of this memorandum is to provide an outline for discussion at a Council work session meeting, and to seek guidance on whether, and if so, how, to regulate dockless mobility devices within the Town. This memorandum will present the following policy questions for your consideration:

- 1. Should the Town regulate the use of dockless mobility devices and, if so, should the regulations include provisions governing:
  - **A.** the **licensing** of businesses that provide dockless mobility devices for public use?
  - **B.** the operation of the devices by the users?
  - C. the parking of the devices?
  - **D.** the placement of devices for start of trip?

And

2. Should the Town allow the use of electric bicycles and/or electric scooters on the Town's recreational paths, and if so, under what conditions or limitations, if any?

# **DISCUSSION**

- 1. Should the Town regulate the use of dockless mobility devices and, if so, should the regulations include provisions governing:
- A. License Required. The requirement for a license is the primary tool proposed to manage commercial operators of dockless mobility device systems in Frisco (referred to herein as "Licensees"). Other types of device providers would not be required to be licensed because their devices are restricted to a limited group of riders with whom the operator has a separate, primary relationship, and such devices are provided as an ancillary component of the provider's primary business. Such unlicensed operators might include:
  - A landlord providing devices only to its tenants,
  - A school providing devices only to its students and staff,
  - An employer providing devices only to its employees, or
  - devices restricted to the operator's private property (e.g., a fleet restricted to use on the property of a college or hospital).

Requirements of licensure would be typical of those required for other businesses that must have an industry-specific license, and would include detailed application requirements to:

- (i) allow for ready identification of, and communication with, the operator;
- (ii) require public liability insurance and indemnification of the Town, as well as a bond or other financial guarantee to cover the Town's costs of enforcement (such as costs of removal and storage of mobility devices blocking a right-of-way, or that have not been retrieved by an operator within the requisite time period); and
- (iii) require application and license renewal fees to cover the Town's costs of application review and general license enforcement activities.

Licensing provisions would also include enforcement through license suspension or revocation proceedings, which is often a more efficient and effective means of enforcement than is resort to the municipal court.

Town Council is asked to confirm whether a license as described above, along with any necessary municipal code changes, should be instituted to manage devices operating in Frisco?

- **B. Device Operation** Operating requirements and limitations are the primary tool proposed to manage users of dockless mobility device systems in Frisco (referred to herein as "Riders") to promote their safety, and the safety of others. These provisions would apply to all Riders, regardless of who may have provided the dockless device for use.
  - 1. <u>Safe Operation of Devices</u> The current municipal code includes provisions applicable to many types of vehicles that require reasonable and prudent operating for the conditions that exist, yielding to pedestrians, and prohibiting operating in a manner demonstrating lack of adequate control or carelessly or in an imprudent manner.

Such provisions could be applied to device use. Other components of municipal code provisions applicable to operating devices could include the following:

- prohibit distracted and impaired riding,
- prohibit transporting more than the number of riders for which the device is designed,
- require single-file riding if two abreast riding impedes the normal and reasonable movement of traffic, and
- require use of an audible warning prior to passing.
- **2.** <u>Rider Expectations</u> The most effective regulations for many activities are those that are relatively intuitive and generally consistent with reasonably similar situations. Of all the long-standing mobility modes, devices have characteristics most similar to bicycles as demonstrated by the following:
  - the devices can move noticeably faster than pedestrians,
  - the devices typically only transport one person at a time,
  - the devices provide less protection to the Rider than the size and mass of an automobile,
  - the devices have neither the power nor potential speed of motorcycles, and
  - the devices include bicycles and approximate bicycle speeds and space needs.

Given the similarities, device operation recommendations are primarily designed to treat devices similarly to bicycles for which operating rules exist.

3. <u>Infrastructure Discontinuity</u> – One factor relevant to consider with respect to device operation is the limited continuity of some transportation infrastructure. As in most municipalities, in Frisco, motor vehicle lanes are the most complete transportation infrastructure network. Bicycle lanes, sidewalks and shared use paths are commonly discontinuous. Relegating any mode of transportation other than cars and trucks to a single type of facility may be impractical. However, where options exist, encouraging the safest option is sensible.

For devices, the hierarchy from most desirable operating location to least desirable could generally be:

- i. bicycle lane;
- ii. paved shoulder of streets with speed limits of 35 MPH or less;
- iii. shared use path (if any, see next policy question no. 2 below);
- iv. on the right-side motor vehicle lane of streets (similar to current bicycle use) with a speed limit of 35 MPH or less;
- v. sidewalk;
- vi. paved shoulder on a street with a speed limit that exceeds 35 MPH; and
- vii. on the right-side motor vehicle lane of streets with a speed limit that exceeds 35 MPH.

This hierarchy recognizes that a difference in speed between vehicles, even between two cars, is a significant factor in crash frequency and severity. It also recognizes that these devices tend to be quiet and can move rapidly compared to pedestrians. This recommended hierarchy would also leave some discretion to the Rider. For instance, bicyclists currently have the option to ride on a sidewalk or in the street. With riding safely being the underlying requirement, allowing a Rider to exercise some judgement to choose a safe and reasonably comfortable riding location may be appropriate.

As an example, some experienced bicyclists including many bicycle commuters tend to prefer riding on street pavement where they are more visible and have fewer driveways and curb ramps to negotiate. Less experienced and more leisurely recreational bicyclists often prefer an off-street, shared use path. However, such generalities do not address every bicyclist. Continuing the model

- of Rider responsibility and providing some range for Riders to apply good judgement seems appropriate.
- **4. Prohibitions** There may be areas where certain transportation modes should be explicitly prohibited. For instance, riding electric scooters or bicycles on the more pedestrian-active (and somewhat narrow) sidewalks in the Main Street area of Frisco may be less desirable when Main Street itself provides an option that is relatively low-speed that can accommodate these devices. The Main Street sidewalks also have more pedestrian distractions (e.g., store fronts and doors) that can cause pedestrian movements that are less predictable to a device Rider and that carry an associated higher risk of a collision. Prohibiting riding Devices on the Main Street sidewalks or other designated, high foot-traffic areas may be appropriate.

# Town Council is asked to confirm whether Device operating requirements and guidance should conform to the information above?

- **C. Device Parking** These provisions would be proposed to apply to all Riders. Today, bicycles can be legally parked on the street next to the curb, on sidewalks without unduly obstructing the pedestrian path and in or adjacent to bike racks. Thoughtful parking can prevent several issues including the following:
  - Significantly or fully blocking sidewalks or intersection ramps from others,
  - Scattering devices rather than consolidating the parking area at high use locations, and
  - Parking devices on landscaped areas.

Preventing these issues may include simple steps such as:

- 1. requiring that each parked device be left standing rather than laying down;
- 2. requiring the use of existing bicycle racks or parking adjacent to racks, when available;
- 3. requiring that devices are parked parallel to the direction of pedestrian travel rather than perpendicular;
- 4. where space is narrow, a requirement to retain at least a three foot wide unobstructed path;
- 5. a requirement for parking beyond or before a pre-existing obstruction to pedestrian traffic (e.g., at the side of a bus stop shelter) so as not to increase the encroachment into pedestrian flow; and

6. A requirement for parking close to the edge of a sidewalk or path and not obstructing ramps for those with disabilities.

# Town Council is asked to confirm whether Device parking should conform to the information above?

As a side note, as device utilization becomes better understood, it seems possible that marking designated parking areas may become helpful in higher use areas. Some locations will tend to have more devices and may warrant physically designating a specific area for parking for reasons of both safety and convenience. Code changes could be easily made at such time as deemed necessary to require parking in such designated areas.

# **D.** Device Placement for the Start of Trips

1. <u>Device Redistribution</u> – These proposed provisions would apply only to Licensees.

Routine redistribution of devices is necessary to have them available where they are needed. This is an interest shared by the Riders, the Town and Licensees. The locations where devices are desired by Riders will become more evident as usage data become available. Licensees will usually redistribute devices nightly and may redistribute more often to address anticipated demand. Device redistribution is also an opportunity to correct poor parking.

Each Licensee would propose and then be required to adhere to a redistribution plan approved by the Town. The code provisions could authorize the Town, within limits, to restrict how many devices can be deployed to any one block face or at any specific intersection or other location by each Licensee, and could be the means by which the Town places reasonable limits on the number of devices that could (or must) be redistributed to areas such as the Marina or the PRA.

**2.** <u>Device Retrieval</u> – These proposed provisions would apply to all providers of a device, regardless of whether the provider is a Licensee (e.g. they would apply to an employer who provides the devices only for use by its employees).

Providers would be obligated to retrieve, within a defined amount of time, each device that:

- Is improperly parked,
- Is unused for any 48-hour period, or
- Causes a verified complaint of a code violation.

Town Council is asked to confirm whether the approach described above for redistributing and retrieving Devices is appropriate?

# 2. Should the Town allow the use of electric bicycles and/or electric scooters on the Town's recreational paths, and if so, under what conditions or limitations, if any?

Currently, no motorized vehicle or conveyance is allowed to use the Town's recreational paths with the exception of (i) authorized maintenance or emergency vehicles, (ii) motorized wheelchairs and similar devices, and (iii) electric-powered bicycles. Recently, with respect to electric-powered bicycles, Summit County limited the use of its recreational paths to what is known as a "Class 1" electrical-assisted bicycles (e-bikes that engage the electric motor only under pedal assist, and that have a speed governor that cuts off the electric motor at twenty (20) miles per hour).

In order to maintain continuity of allowed uses of recreational pathways throughout the county, Summit County has asked the several municipalities in the county to limit the use of their recreational paths to Class 1 e-bikes. The Town of Breckenridge is in the process of changing its code to allow only Class 1 e-bikes, having passed an ordinance on first reading on April 9, 2019.

To my knowledge, there has been no discussion amongst the County or the several municipalities within the county concerning the allowance of e-scooters on recreational pathways. Until such time as regulations may be changed, e-scooters would remain prohibited under the general prohibition of motorized vehicles on such pathways.

Town Council is asked to confirm whether the motorized use of the Town's recreational pathways should be limited to Class 1 e-bikes?

# **CONCLUSION**

Thank you for your consideration of each of the policy questions presented above. I look forward to discussing the various regulatory avenues available to the Town with respect to dockless mobility devices, and the businesses that are evolving to provide transportation systems by utilizing them.

As always, I am happy to respond to any questions or concerns that you may have about any of the information provided or questions presented above.

#### **MEMORANDUM**

P.O. Box 4100 ◆ FRISCO, COLORADO 80443

To: MAYOR AND TOWN COUNCIL

FROM: BILL GIBSON, ASSISTANT DIRECTOR AND JOYCE ALLGAIER, DIRECTOR

RE: COMMUNITY DEVELOPMENT DEPARTMENT REPORT

DATE: APRIL 23, 2019

# **Planning Commission Activities:**

Planning Commission meeting on March 21, 2019:

<u>1. Planning File No. 238-18-MAJ:</u> A public hearing of the Major Site Plan Application for the proposed Rainbow Court East Building mixed-use project, located at 310 East Main Street / Lots 3-5, Block 9, Frisco Townsite. Applicant: Myra Mesko, MM Properties LLC

The Planning Commission opened the public hearing, reviewed the application, and continued the public hearing to its April 18, 2019 meeting.

Planning Commission meeting on April 4, 2019:

1. Work Session to discuss the Community Plan update. The discussion will focus on the topics of land use and economics.

The Planning Commission discussed the community plan and provided input to staff. As this was a work session, no formal action was taken.

### **Planning Division Activities:**

Administrative review applications approved last month: 8

# **Building Division Activities:**

- Permits issued last month included the following:
  - o Building Permits: 12
  - o Plumbing & Mechanical Permits: 12
  - o Electrical Permits (issued by Summit County): 9
- Valuation of permits issued last month: \$814,107
- Inspections performed last month: 116
- Rapid Review Wednesday customers assisted last month: 22
- Certificates of Completion / Certificates of Occupancy issued last month: 2

# **Front Desk Activities:**

Phone calls and walk-in customers served last month: 459

#### MEMORANDUM

P.O. Box 4100 ◆ Frisco, Colorado 80443

To: MAYOR AND TOWN COUNCIL

FROM: SUSAN LEE, COMMUNITY PLANNER
RE: PARKS MASTER PLAN UPDATE

DATE: APRIL 23, 2019

**Summary:** This memo is intended to provide an update regarding the status of the Park Master Planning efforts. No specific action is being asked of the Town Council at this time.

<u>Background</u>: In the 2019 budget, Town Council approved funds for park improvements. As part of the community outreach process for the Community Plan Update, a special public meeting was held on November 7, 2018. This meeting was focused on defining the character, opportunities, and challenges at each of Frisco's community parks. Outcomes from the meeting included a prioritization for improvements at four parks including: Walter Byron, Meadow Creek, Pioneer Park, and Old Town Hall and Community Center Parks. In order to thoughtfully plan for upgrades and improvements, staff is conducting a master planning process for each of these parks. Staff has contracted with Norris Design to help facilitate the planning process.

The master planning effort will consist of three phases:

- 1) Community outreach including public open house meetings, and a statistically valid survey.
- 2) Conceptual design development where key concepts developed from the public input will be presented to Town Council and the Planning Commission.
- 3) Final design and budgeting to include details on each park design as well as cost estimates for implementation phasing and budgeting.

The public meetings will be in open house format. The meetings will be held from 4:00 to 6:00 pm at each of the parks in order to focus participants' attention on the specific conditions of each facility. The tentative meeting schedule is:

- May 8, 2019, Pioneer Park
- May 15, 2019, Walter Byron Park
- May 22, 2019, Meadow Creek Park
- May 29, 2019, Old Town Hall & Community Center

Staff anticipates presenting the conceptual plans generated from the community outreach and planning process at the June 25, 2019, Town Council work session.

Tasha Wilson, Information Center Manager, is participating in the Colorado Tourism Leadership Journey program, through the Colorado Tourism Office, and through this program is responsible for an action learning project. Through this project and this program, Tasha has offered to provide additional support for the public outreach efforts for the Old Town Hall & Community Center Parks. Tasha's letter of support and consideration is attached as Exhibit A. Staff supports this request.

**Recommendation:** This memo is for informational purposes.

Financial Impact: Anticipated costs for the Parks Master Plan are as follows:

- Planning and design services bid at \$23,400 (includes a \$4,000 add alternate)
- Site surveys estimate \$10,000
- Wetlands delineation bid at \$2,800
- Statistically valid survey estimate \$7,000
- Marketing and outreach estimate \$1,000

In the 2019 budget, there is \$125,000 (2000-5093) allocated for site improvements at the Town of Frisco parks. This \$125,000 request is an annual request for five years. The anticipated amount above of \$44,200 would come directly out of the \$125,000 budgeted amount for 2019.

**Reviews and Approvals:** This report has been reviewed by:

Diane McBride, Recreation Director Nancy Kerry, Town Manager -- Approved Bonnie Moinet, Finance Director

#### **Attachments:**

Exhibit A: Letter from Tasha Wilson, Information Center Manager

Exhibit B: Summary from November 7, 2018, Community Plan Open House on Parks

Dear Mayor and Town Council,

I am currently enrolled in the Colorado Tourism Leadership Journey program. Through this program, I am required to complete an action learning project approved by the Town of Frisco. The project I am proposing is a re-imagination of the Old Town Hall Park. I would like to lead a committee in a brainstorm session that will thoughtfully consider Council's and the community's desires for the Old Town Hall Park. I would team up with Susan Lee and the Parks Master Plan committee to coordinate efforts.

The Colorado Tourism Leadership Journey was created by the Colorado Tourism Office for "aspiring leaders with a demonstrated commitment to a career in the tourism industry and a passion for sharing the Colorado experience." The program aims to strengthen Colorado's competitive advantage through development of a "stronger, more unified tourism industry that will be even better equipped to serve as one of the state's leading economic drivers." I applied for and was accepted into the program through a competitive process. The program began in October 2018, and will be completed in October 2019.

At the Frisco Community Plan parks outreach meeting in November 2018, the community expressed that the Old Town Hall Park, near the Frisco/Copper Visitor Center, was underutilized and felt too private. It was suggested that the park receive a new identity that promotes a feeling of openness.

As we progress with the overall Parks Plan to improve upon Frisco's parks including Walter Byron, Meadow Creek, Pioneer, the Old Community Center and the Old Town Hall parks, there is opportunity for us to address the community's desires expressed in the Community Plan, regarding Old Town Hall Park, in a way that creates a sense of openness while reducing the sense of isolation.

With your support, I would work directly with the Parks Master Plan committee, I help would lead the May 29<sup>th</sup> community outreach meeting at the Old Town Hall & Community Center, I would create a small subcommittee of community members to help further define the Old Town Hall Park with tangible results, and I would work with my colleagues on appropriately prioritizing and budgeting for improvements to the Park.

Thank you for your review and consideration.

Sincerely,

Tasha Wilson
Frisco/Copper Visitor Information Center Manager

Phone: 970-668-5547

# Parks Meeting Summary November 11, 2018

**Meeting Description:** A community open house on parks was held on November 8, 2018. The purpose of this meeting was to gain community insight on the challenges and opportunities at each of our parks with an emphasis on smaller, neighborhood parks. Presentation materials were designed to inform and elicit comments from the public on each of the following parks: Pioneer Park, Walter Byron, Meadow Creek, Community Center Park, Old Town Hall Park, Triangle Park, Post Office Park, Kayak Park, and Peak One Park.

The following information is a summary of the main themes and discussion points represented at the meeting.

#### **Overall Themes**

# Frisco's citizens value access to high quality recreational experiences.

- Frisco has natural assets including surrounding landscape, trails, and world class skiing.
   Recreation facilities should be designed to strengthen and diversify the amenities available here.
- Frisco should continue to reinvest in and enhance our existing park facilities with a broad range of new, innovative amenities that keep up with current trends.
- Park facilities should be maintained and upgraded to achieve a high level of quality, safety, aesthetic appeal, and function.
- Strive to provide safe and convenient access to all parks and recreation facilities. New facilities should be coordinated with the Trails Master Plan to ensure appropriate connections and access.

## Local parks are an important part of our community fabric.

- Parks and facilities should be designed, built, and managed to create spaces for community gathering and promote social interaction, as appropriate for each park.
- Park facilities and amenities should utilize consistent visual cues (signage, site furnishings, and maintenance standards) to communicate public accessibility to users.
- Signage and hardscape elements should communicate linkage to the larger park network.
- New developments should dedicate appropriate space for trails and recreation facilities necessary to meet the needs of the development and its future users.
- Park programming should be consistent with the park's character.
- Recognize that the park system provides important ecological functions and should be maintained and operated to preserve and enhance those functions (i.e. storm water management, water quality, wildlife migration corridors, etc.).

# Frisco is the center of a larger community.

 Frisco should coordinate with other agencies (i.e. USFS, Summit County) to meet community park, trails, open space, and recreation needs in a cohesive and efficient manner.

## **Specific Park Themes and Ideas**

#### Pioneer Park:

- Quiet character defined by tennis courts and forested, natural area.
   "Highlight the tennis courts and showcase the quiet nature of the park."
- Strong support for maintaining as a natural oasis and adding a nature play area with possible connection to the small wetland area. Some support for a basketball court.
- Needs upgraded signage and site furnishings. Landscaping should be opened up to make park more inviting. Pedestrian connections should be improved.

#### Walter Byron:

- Park is viewed as a place for active recreation, social gatherings, and more developed park amenities.
- Strong support for improved restrooms, community gathering space, improved playground with updated amenities. Develop additional seating along the river.
- Some support for improved water interaction (fishing pier on pond, kayaking, etc)
- Add interpretive signage to wetlands to keep out disturbance and designate Kayleigh's Pond for more active water uses.

# Meadow Creek:

- Character somewhat defined by surrounding uses (transfer center). Use appears to be primarily shorter duration/pass-through in summer and ice hockey in winter.
- Programming to increase year round usage and perception of safety eyes on the park.
- Hockey users were supportive of lights, better ice, and boards. Possibly a warming hut/restroom facility.
- Adding a dog park to increase use and perception of safety (has limitations).

#### Community Center and Old Town Hall Pocket Parks:

- Primarily seen as an underutilized gathering space or passive use park for sitting, reading, talking with friends. Areas of refuge for Main Street visitors. Parks need to develop a new identity.
- Some support for affordable housing:
   "The land is too valuable for an uninteresting pocket park next to an old, outdated building."
- Most people commented that both parks feel too private. Revamping of the hard and softscape to promote feeling of openness and develop into a more of an urban plaza.
- Multiple people posed the idea that the 3<sup>rd</sup> Avenue right of way be converted to a green space or plaza.
- Possible location for farmer's market or beer garden.

## Triangle Park:

- Current character defined by entry feature. Viewed as a gateway to the community and Main Street. Sets tone and expectation for Main Street visitors.
- General comments are it is an attractive and appropriate entry feature. "Keep open and uncluttered as gateway to Main Street."

 Support for adding more art, and redesigning entry feature to allow more room for landscaping/park features. Work on this park should be scheduled to coincide with the completion of intersection improvements by CDOT in 2020.

#### Post Office Park:

- A garden oasis on Main Street. This area is appreciated and enjoyed by users passing through to the post office.
- Some support for connecting to the trail along the creek, demonstration garden, and adding picnic tables.

## Kayak Park:

- Somewhat unknown by many community members.
- Strong support for programming to promote and better utilize the park and create opportunities for engagement with the river. Kayak demos, toy boat races, kids play area (during low flows), deck overlook.
- This area is viewed as an important gateway to Main Street and should be upgraded with welcoming signage and landscaping.
- Improve pedestrian connectivity between park, parking area and Main Street.

# Peak One Park:

 Viewed as a private, neighborhood green space. Most commented that it should be maintained as an open lawn area, possibly adding a small playground for neighborhood use.

Revenues	\$6,370,000	\$5,737,497	90.1%
Expenditures	\$5,438,064	\$267,173	4.9%
25% OF TH	HE FISCAL YEAR	R HAS ELAPSE	

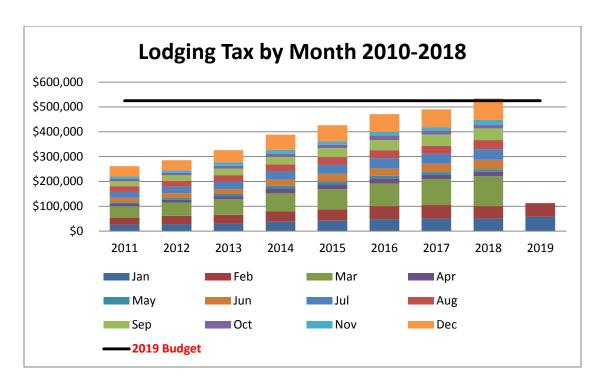

Year-to-date through February is up6.93% or \$117,930 compared to Y-T-D 2018. For the month of February, revenues are up 4.02% or \$33,772 compared to February 2018.

The most significant growth, in terms of actual dollars, was exhibited in the Retail-General, Grocery, Vacation Rentals and Restaurant categories. The most significant factor, however, in the growth of all of the above-listed categories remains the great snow conditions this season, especially when compared to the rather paltry winter of 2017-2018.

The most significant declines, in terms of actual dollars, were exhibited in the Home Improvement category. An abnormally strong February of 2018 was more responsible for the high level of decline than any factor present in February of 2019, though the difference in weather between the two periods may have had an impact.

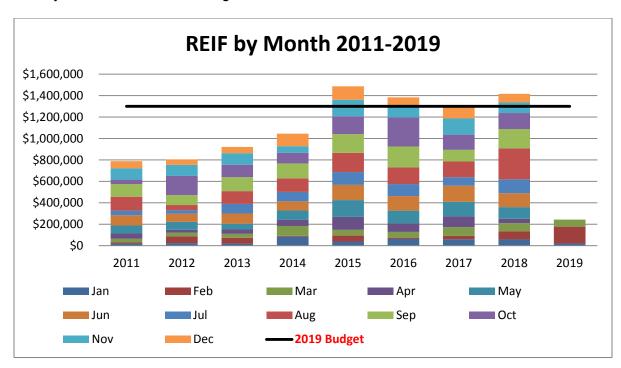

All in all, February was another very positive month for the Frisco business community and, thus, for sales tax revenue generation. Strong national, state and local economies continue to drive population, employment and ancillary spending growth. Infrastructure improvement and marketing efforts undertaken by both the Town and by private enterprises have helped to attract new businesses and generate additional commercial activity. Frisco's positioning as a hub for grocery shopping conveniently located off of I-70 in the center of Summit County also bolsters categories outside of the Grocery umbrella. As a mainly service-based local economy facing challenges in regards to hiring, the efforts of front-line employees in providing the service and experience necessary to maintain this sort of momentum cannot be overstated.

Nonetheless, it is vital, especially when viewed in the context of almost a decade of sustained growth, to keep the very real downside risks inherent in the local economy in the forefront of our minds when preparing for the mid- and long-terms. That said, staff remains bullish in the short-term and confident that 2019 budgeted revenues will be met and/or exceeded by year end.

Year-to-date through February is up 12.25% or \$12,308 compared to Y-T-D 2018. The actual year to date dollar amount for February is \$112,808 compared to \$100,500 for January 2018.

Staff remains bullish on the short-term Frisco economy and, on the heels of a very strong February, confident that 2019 budgeted revenues will be met and/or exceeded.

Year-to-date through March is up 15.36% or \$32,374 compared to Y-T-D 2018. The actual year-to date dollar amount is \$243,093 compared to \$210,719 Y-T-D 2018.

## Based on a vendor's incorrectly filed returns at the State level, the Dept. of Revenue redistributed a significant amount of County sales tax in the Automotive category for February of 2014

<sup>\*</sup> Totals include late penalties & interest...

<sup>\*\*\*\*\*</sup> Beginning January 2014, medicinal marijuana sales tax will be removed from the Health/Beauty category and reported in a new category, along with retail marijuana sales tax

# RECORD OF PROCEEDINGS MINUTES OF THE REGULAR MEETING OF THE TOWN COUNCIL OF THE TOWN OF FRISCO APRIL 9. 2019

Mayor Wilkinson called the meeting to order at 7:00 p.m. Town Clerk Deborah Wohlmuth called the roll.

<u>Present</u>: Jessica Burley

Dan Fallon Rick Ihnken

Hunter Mortensen Deborah Shaner Gary Wilkinson

Absent: Melissa Sherburne

#### Public Comment:

Frisco residents Judy Phillips, Jennifer Anquil, and Bobby, Malachai, and Tirzah Ryan spoke in support of Frisco fireworks, and suggested that Council continue the conversation.

Frisco resident Eric Roth spoke regarding consistent implementation of occupancy limits in all Frisco neighborhoods, and in both short and long term rentals.

Frisco resident Judy Phillips thanked Council for their support of Bethany Immigration Services.

#### **Council Comment:**

Mayor Wilkinson and Council Member Burley thanked staff and contractors for the Touch a Truck event at the Frisco Marina.

Mayor Wilkinson announced that Frisco won "The Best Place to Work" category from the Summit Chamber awards.

Council member Burley requested an update regarding the Wetlands Mitigation program at the Marina.

Council directed staff to enforce parking regulations.

Council members Shaner and Fallon thanked the audience for their feedback regarding the fireworks cancellation and discussed public safety concerns surrounding Frisco fireworks.

#### **Consent Agenda:**

- Minutes March 26, 2019 Meeting
- Home Rule Charter Review Chapter 25, Investments
- Investment Policy

Frisco Town Council Minutes April 9, 2019 Page 3 of 5

COMMENTS 4) MAYOR CLOSES PUBLIC HEARING 5) COUNCIL DISCUSSION 6) MOTION MADE 7) MOTION SECONDED 8) DISCUSSION ON MOTION 9) QUESTION CALLED

Assistant Community Development Director Bill Gibson stated that this is the second reading of Ordinance 19-04 amending specific elements of Chapter 180, Frisco Unified Development Code (UDC), including the allowance for Commercial/Industrial Laundromats in the Light Industrial Zoning District. The current UDC was adopted in total through Ordinance 17-04 in June of 2017. The purpose of the 2017 UDC project was to upgrade, consolidate, and reformat the former subdivision and zoning regulations. It was acknowledged at that time that additional corrections and policy amendments to these regulations would be forthcoming over time. Therefore, Staff is also proposing various "housekeeping" and substantive code text amendments to the UDC including an amendment prohibiting a residential use on the ground floor on properties within the Central Core is included in this group of amendments. Mayor Wilkinson opened the public hearing at 7:26 p.m. There being no public comment, Mayor Wilkinson closed the public hearing at 7:27 p.m.

#### MEMORANDUM

P.O. Box 4100 ◆ FRISCO, COLORADO 80443

To: MAYOR AND TOWN COUNCIL

FROM: DIANE MCBRIDE, ASSISTANT TOWN MANAGER

RE: LETTER OF SUPPORT – GREAT OUTDOORS COLORADO CONNECT INITIATIVE

GRANT APPLICATION – HIGHWAY 9 PEDESTRIAN AND BICYCLE UNDERPASS

DATE: APRIL 23, 2019

<u>Summary</u>: Summit County Government submitted a Great Outdoors Colorado (GOCO) Connect Initiative grant request for \$1,203,348 to support construction of the underpass and recreational pathway connection between the County Commons and the Peninsula Recreation Area. This underpass is part of the Colorado Department of Transportation (CDOT) State Highway 9 (SH 9) "Gap" project. CDOT has included the underpass and recpath segments in their designs however, they have not committed construction funding to the underpass project. The total cost estimate for construction of the "Gap" project is ~\$15M. CDOT has requested help from the local entities, County and Town, to fund the underpass portion of this project through grant opportunities.

The total project budget for the underpass is estimated to be \$1,604,465. The difference between the total project budget for the underpass and the grant request is \$401,117. Preliminary conversations between CDOT, Summit County Government, and the Town of Frisco propose a 50% split of this cost between the County and the Town. Summit County Government has requested a letter of support, including financial support, from the Town of Frisco for the GOCO grant.

The grant request is a concept paper at this time. If invite by GOCO for further review, that review would occur on June 13, 2019. Final notification for funding would occur September 27, 2019, with a three year project deadline.

<u>Background:</u> The final phase of the roadway widening project along the SH 9 corridor between Breckenridge to 1-70 (Exit 205 in Frisco) is scheduled for 2020 and 2021 construction. This final phase, known as the "Gap" project, widens the segment of SH 9 between Main Street in Frisco and the intersection at the Summit Medical Center/Frisco Adventure Park & Peninsula Recreation Area (PRA) to two lanes in each direction. One of the critical success factors for the SH 9 project is improving multimodal connectivity.

The ped/bike connection from the County Commons to the PRA via the underpass was identified as a community goal in the Frisco Trails Master Plan and the County Commons Master Plan. CDOT has included the underpass and recpath segments in their designs however, they have not committed construction funding to the underpass project. CDOT, Summit County, and Frisco are the key partners in the project.

The proposed underpass is a 10'-9" x 16' Steel Arch with 1,100 linear feet of 12' wide paved pathways with 2' shoulders connecting on either end, designed to meet current AASHTO standards for bicycle facilities. The underpass is located on CDOT right-of-way, and the installation of the underpass requires the vertical alignment of the highway to be adjusted.

**Recommendation:** This grant request aligns with the Town Council's vision for a healthy and vibrant community. The underpass will provide improved multimodal connectivity and enhanced recreational opportunities. The project aligns with the Frisco Trails Master Plan and the Community Plan.

On that basis, staff recommends the Town Council sign the letter of support for the GOCO Connect Initiative grant.

<u>Financial Impact:</u> CDOT's estimated cost for the underpass is \$1.5M. The GOCO grant request is for \$1,203,348, with \$401,117 the responsibility of the grant applicant for a total project cost of \$1,604,465. This \$401,117 is the 25% match requirement by GOCO for the project. Besides the \$1.5M for the underpass as estimated by CDOT, County staff budgeted an extra \$104,465 for 1,100 linear feet of recpath connections to and from the tunnel. Approximately 300 linear feet of this connector recpath would be on Town of Frisco property.

Should Summit County Government be awarded the GOCO grant, the Town of Frisco may be responsible for this 50% split of the match requirement of the grant, which equates to \$200,559. These funds would be needed in either 2020 or 2021.

# TOWN of FRISCO

P.O. Box 4100 · Frisco, Colorado 80443 (970)668-5276

April 23, 2019

Great Outdoors Colorado 303 E. 17<sup>th</sup> Avenue, Suite 1060 Denver, CO 80203

LETTER OF SUPPORT: 2019 GOCO Connect Initiative Grant Application – Highway 9 Pedestrian and Bicycle Underpass

Dear Review Committee Members,

I am pleased to offer my strong support of Summit County Government's application for a Great Outdoors Colorado (GOCO) Connect Initiative Grant. Recreation is the lifeblood of our small community. We receive visitors from around the country and world seeking to explore Frisco, Summit County, and beyond. Community members and visitors utilize Summit County's extensive recreational pathway system to travel throughout the town, and to connect to other towns within the County.

The GAP project is the final widening project on the SH 9 corridor from Breckenridge, through Frisco, to I-70. Not only will this project include widening of the highway to include two through lanes in each direction, it will also provide a safe pedestrian underpass connection between the bus stop at the county offices and the Peninsula Recreation Area (PRA). The PRA is a recreation mecca for the Town of Frisco with both summer and winter amenities. This pedestrian underpass will alleviate the safety concerns that are currently present with guests crossing the highway to make the connection between the bus stop at the county offices and the amenities at the PRA. With over 100,000 guests visiting the PRA during the winter months alone, this safe ped/bike connection is highly desirable to the Town of Frisco.

Over the last 40+ years I have watched our community evolve and change. Having been a member of the Summit County Countywide Planning Commission and Ten Mile Planning Commission, I have a strong understanding of land use, as well as what issues Frisco and Summit County will face in the future. I helped with the development of the most recent Frisco Community Plan, the Frisco Trails Master Plan, as well as the Ten Mile Basin Master Plan, and Countywide Comprehensive Plan. Each of these planning documents addresses a number of elements important to our community, notably connectivity through existing and future recreational pathway infrastructure.

As a long-time resident and now Mayor, I am keenly aware of what our community wants and needs. The State Highway 9 Pedestrian and Bicycle Underpass project is important to Frisco's full time residents, visitors, and businesses and I urge you to fully fund Summit County's GOCO Connect Initiative Grant application. The Town of Frisco is financially committed to working with Summit County Government to meet the 25% match required by GOCO for this project.

Sincerely,

Gary Wilkinson Mayor Frisco Town Council

#### **M**EMORANDUM

P.O. Box 4100 ◆ Frisco, Colorado 80443

To: MAYOR AND TOWN COUNCIL

FROM: DEBORAH WOHLMUTH, TOWN CLERK

RE: NEW FERMENTED MALT BEVERAGE LICENSE - VITAMIN COTTAGE NATURAL FOODS

MARKETS, INC. DBA NATURAL GROCERS

DATE: APRIL 23, 2019

<u>Background:</u> As prescribed in State Statute, all new liquor license applications must be first submitted to the local licensing authority for approval. Supporting documentation as outlined on State form DR 8404 must accompany the application to begin the hearing process requirements. The preliminary findings have been included in this report to support proof of a completed application.

Analysis: This application is for a new Fermented Malt Beverage liquor license for Vitamin Cottage Natural Foods Markets, Inc. dba Natural Grocers located at 970 North Ten Mile Drive. Applicants Vitamin Cottage Natural Food Markets, Inc., Kemper Isely, Zephyr Isely, and Heather Ilsely have filed the necessary paperwork and posted the premise in accordance with the Colorado Liquor Code. Further, notice of this application was published in a newspaper of general circulation on April 12, 2019 pursuant to statutory requirements. Pursuant to Colorado Revised Statutes, no fingerprints or addition background investigation forms are required as the applicant has a Masterfile on record with the State. Effective June 4, 2018, CRS 44-3-301(12)(a.5)(I) provides direction that licensing authorities shall not issue a new FMB license if the retail license is located within five hundred feet of a retail liquor store. The proposed location is not within five hundred feet of any existing retail liquor store.

Staff Recommendation: On that basis, it is recommended the Council make a motion approving the issuance of a new Fermented Malt Beverage liquor license for Vitamin Cottage Natural Foods Markets, Inc. dba Natural Grocers located at 970 North Ten Mile Drive., on the basis of the following findings: that the Authority (1) has reviewed the neighborhood under consideration and finds it to be the Town of Frisco as a whole; (2) has considered the desires of the inhabitants of the neighborhood and finds that the inhabitants desire an additional establishment that serves liquor; (3) has reviewed the needs of the neighborhood are not met by the existing outlets; (4) has reviewed the location of the proposed establishment and finds that it is not located within 250 feet of any school or college campus; (5) has reviewed the qualifications of the applicant and, pursuant to the requirements of the Frisco Code and Colorado Statutes, find the applicant to be qualified to obtain a Fermented Malt Beverage liquor license for Vitamin Cottage Natural Foods Markets, Inc. dba Natural Grocers.

Financial Impact: There is no financial impact.

#### MEMORANDUM

P.O. Box 4100 ◆ Frisco, Colorado 80443

To: MAYOR AND TOWN COUNCIL

FROM: JOYCE ALLGAIER, COMMUNITY DEVELOPMENT DIRECTOR

RE: RESOLUTION 19-18, ADOPTION OF THE SUMMIT COMMUNITY CLIMATE ACTION PLAN

DATE: APRIL 23, 2019

<u>Summary</u>: This agenda item introduces Town of Frisco Resolution 19-18, adopting the 2019 Summit Community Climate Action Plan, for the review, discussion and decision-making by the Town Council. Jess Hoover, HC3 Climate Action Director, will be present to provide an overview, additional information, and address guestions by the Town Council.

<u>Background</u>: As part of the 2018 budget, Town Council approved of a \$25,000 allocation funded to HC3 for their assistance and support in the drafting of a regional Climate Action Plan. Headed up by HC3, the planning process was to include a baseline greenhouse gas study and identify short and long term goals with specific strategies to achieve those goals. In addition to allowing Frisco to help fulfil its own sustainability goals, the climate action plan project was intended to help the town meet its Compact for Colorado Communities commitments.

Now completed, the Plan is the product of the Summit Climate Action Collaborative, a group of communities, businesses, and organizations who funded and provided input on the plan. A steering committee, along with several expert groups provided direction, gave technical advice, and developed goals and action strategies. The consulting firm of Lotus Engineering and Sustainability facilitated the year-long planning process and drafted the initial report, in partnership with HC3. It is expected that the Summit Climate Action Collaborative will stay intact to monitor progress and implement the Plan on a regional basis over time.

The Collaborative recognizes that changes and innovations in technology and the economy over the coming years will likely make new strategies applicable to our community. Therefore, the Collaborative plans to remain open, engaged and informed of additional opportunities to drive greater emissions reductions over the coming years.

This report includes Attachment A, Potential Implementation Strategies, as assembled and recommended by the Town's Department Directors and the Green Team. Cost of implementation is associated with these actions to the best extent possible and is discussed further in the Financial Impact section of this report.

Adoption of the Climate Action Plan aligns with the Council's identified strategic priorities to take action on climate change; in addition, the proposed actions in Attachment A, are staff's recommended methods to implement the Climate Action Plan should it be adopted by Council.

Following is a summary of key goals, strategies, and an emission reduction forecast for the overall Summit Community Climate Action Plan.

#### **Key Plan Goals:**

#### Reduce Countywide Emissions 50% by 2030 and 80% by 2050, Below a 2005 Baseline

- 1) Renewable Energy Reduce emissions from electricity use 100 percent by 2035.
- 2) Building Energy Reduce emissions from building energy use 21 percent by 2030 and 36 percent by 2050.
- 3) Transportation Reduce emissions from transportation 25 percent by 2030 and 91 percent by 2050.
- 4) Waste Reduce emissions from waste 50 percent by 2030 and 90 percent by 2050.
- 5) Forests Maintain forest cover in Summit County and improve forest resilience to climate impacts.
- 6) Community Engagement

#### **Key Plan Implementation Strategies:**

#### (1) Renewable Energy Strategies:

- 1. Encourage all jurisdictions to adopt or support renewable energy goals.
- 2. Advocate at the state level for a rapid increase in the amount of renewable energy on the grid.
- 3. Develop a local renewable energy roadmap and/or feasibility study to ensure that we maximize the use of our solar and wind resources.
- 4. Execute a community campaign to increase solar installations through education and bulk purchase programs.
- 5. Streamline the permitting process for renewable energy systems.
- 6. Collaborate with utilities to achieve the goals of this plan.

#### (2) Building Energy Strategies:

#### **Residential Buildings:**

- 1. Develop a homeowner associate, short-term rental, and second-homeowner energy efficiency program.
- 2. Improve and expand existing residential energy efficiency programs to target more homes and gain greater energy savings.
- 3. Host LED bulb giveaways or exchanges for homeowners.

#### **Commercial Buildings:**

- 1. Amend local codes to require mandatory building retro-commissioning.
- 2. Improve and expand existing commercial energy efficiency programs to target more businesses and gain greater energy savings.
- 3. Improve and expand existing commercial energy efficiency programs to target more businesses and gain greater energy savings.
- 4. Adopt local ordinances to require energy reporting for large commercial buildings.
- 5. Promote energy efficiency and renewable energy for school and government buildings.

#### **All-Buildings:**

- 1. Develop an above-building-code standard for new construction.
- 2. Promote energy efficiency and renewable energy for school and government buildings.
- 3. Develop a long-term financing mechanism to provide incentives for reducing energy use and greenhouse gas emissions in buildings.

#### (3) Transportation:

- 1. Support the adoption of more electric vehicles through the development of a community-wide Electric Vehicle Readiness Plan, as well as expanded infrastructure and incentives.
- 2. Switch government fleets to electric vehicles within the replacement cycle and when appropriate models are available.
- 3. Promote clean fuels and alternative fueling infrastructure for heavy-duty vehicles.
- 4. Discourage single occupancy vehicles through incentives, policies and participation in regional initiatives.
- 5. Provide incentives to use public transit within Summit County.
- 6. Develop a Summit County bicycle and walking master plan.
- 7. Partner with utilities to ensure grid capacity for increased electric vehicle charging.

#### (4) Waste:

- 1. Adopt a Save-As-You-Recycle ordinance across the county
- 2. Consider implementing landfill bans on easily recycled items.
- 3. Work with waste haulers to implement curbside food scrap collection program.
- 4. Increase the number of glass collection sites and types of materials accepted at recycling centers.
- 5. Require new construction to include space for recycling and food scrap collection.
- 6. Create codes to require recycling at new construction sites.
- 7. Incentivize deconstruction and reuse instead of demolition in construction and demolition projects.
- 8. Create local markets and infrastructure for used asphalt and concrete.
- 9. Encourage local governments to create and enforce zero waste event requirements, and provide zero waste stations in all county and municipal facilities.

#### (5) Forests:

- 1. Develop and implement a community-wide forest management plan.
- 2. Improve the understanding of forest health in a changing climate.
- 3. Educate and advocate for the important role of forests with regard to climate change.

#### (6) Community Engagement:

- 1. Collaborate with ski areas and towns to promote the Climate Action Plan and implement strategies to educate millions of visitors.
- 2. Create an outreach campaign to engage locals and visitors.
- 3. Provide free workshops to help residents learn how to reduce their carbon footprints.
- 4. Develop programs to engage K-12 and college students on climate change and solutions.
- 5. Utilize special events to share messages, provide resources, and engage participants in carbon reduction strategies.

Resolution 19-18 Summit Community Climate Action Plan Council Meeting: April 23, 2019 Page 4

**Recommendation:** Adoption of the Climate Action Plan is a policy decision of the Town Council. Should the Town Council wish to adopt Resolution 19-18, a motion may be worded as follows:

"I move to adopt Resolution 19-18, adopting the 2019 Summit Community Climate Action Plan."

Financial Impact: With regard to the overarching topic of climate change and its impacts to the Frisco community, it should be noted it is very difficult to fully assess both costs and benefits. The scientific community provides demonstrable evidence of climate change impacts over time in the form of frequency of extreme and damaging weather events, negative health impacts, quantity and duration of snow pack and water resources, environmental damage, and wildfire, among others. With this in mind, and because the Town of Frisco's economy relies heavily on tourism, climate change may impact the Town significantly. The benefit of action (with their associated short-term and long-term costs) sets the community up for greater chances of attaining the Council's 2019 Vision of a sustainable environment, an inclusive community, vibrant recreation, and a continued thriving economy providing the necessary revenue to deliver quality core services to the community.

Attachment A shows potential implementation strategies for each sector of the Plan as prepared by town departments and the Green Team. Associated costs are estimated to the extent possible at this time and will be refined prior to the action being undertaken. Some implementation strategies are currently budgeted for in 2019 (e.g., dumpster enclosure), others are new ideas requiring Town Council approval and budgeting in the future (e.g., fleet conversion to hybrid/electric). Some of the proposed actions have less budgetary impacts when included as part of an approved work program.

If the Town Council adopts the Climate Action Plan, it is recommended the Plan would serve as a framework and guide to be consulted during each budget preparation cycle. Implementation would occur at the direction of Town Council to meet their strategic priorities.

**Reviews and Approvals:** This report has been reviewed by:

Nancy Kerry, Town Manager - Approved Bonnie Moinet, Finance Director

**<u>Attachment A</u>**: Potential Implementation Strategies

#### TOWN OF FRISCO COUNTY OF SUMMIT STATE OF COLORADO RESOLUTION 19 - 18

A RESOLUTION ADOPTING THE 2019 SUMMIT COMMUNITY CLIMATE ACTION PLAN FOR THE TOWN OF FRISCO

WHEREAS, the Town of Frisco recognizes the importance of promoting the public health and safety of residents and visitors, including their access to clean air, clean water, and a livable environment; and

WHEREAS, there is scientific evidence and acknowledgement worldwide that climate change is occurring and that human activity, primarily the combustion of fossil fuels, is responsible for the current global warming trend, causing increased frequency of extreme weather events, drought, heat waves, shifts in agricultural productivity, and negative human health impacts; and

WHEREAS, average temperatures in Colorado have already increased two degrees Fahrenheit in the past 30 years, shortening the winter season by two weeks, with future impacts predicted regarding decreased water availability, increased incidence of wildfire, increased range for bark beetles, less suitable habitat for wildlife, and negative human health impacts from increased heat and air pollution; and

WHEREAS, acting on climate change results in co-benefits such as reduced dependence on foreign fuels, reduced traffic congestion, healthier environments, and stable diversified economies; and

WHEREAS, the 2011 Frisco Community Plan states that, "Frisco is a community that supports zero waste principles, encourages use of clean energy opportunities and promotes resource conservation"; and

WHEREAS, the people of Frisco highly value its relationship to the environment, its quality of life, and its unique small town character and desires to protect these things through climate action initiatives and lead by example; and

WHEREAS, the Town of Frisco has already taken action to reduce greenhouse gas emissions, including an increase in town facility energy efficiency, a movement toward more renewable energy use, increased access to public transit and alternative modalities, implemented the EnergySmart Colorado and Resource Wise programs to help residences and businesses reduce CO2 emissions, and adopted sustainable building and energy codes and the Summit Community Climate Action plan will serve as a guide for further Town of Frisco and community actions; and

WHEREAS, the Summit Climate Action Collaborative, representing local governments, ski areas, educational institutions, and citizens at large, worked over the course of six months to draft the Summit Community Climate Action Plan to address the challenges posed by climate change; and

WHEREAS, public input has been sought after and received at a community open house, and that public input has helped shape the strategies identified in the Summit Community Climate Action Plan.

NOW, THEREFORE, BE IT RESOLVED BY THE TOWN COUNCIL OF THE TOWN OF FRISCO, COLORADO THAT:

<u>Section 1.</u> The Town Council hereby adopts the Summit Community Climate Action Plan prepared by the Summit Climate Action Collaborative and dated March, 2019.

Section 2. This resolution is effective upon adoption.

# Attachment A: Potential Implementation Strategies Summit Community Climate Action Plan: Strategies for a Sustainable Future

#### Renewable Energy Sector

- Public Works
  - Investigate the utilization the wind power purchasing system we were on from 2006-2010.
    - Cost: Staff time for research and recommendation
  - o Replace turf in Town owned medians with fake turf or low water / low maintenance plants / shrubs. Less water = less energy use as well as less emissions from lawnmowers /trimmers.
    - Cost: \$50,000 \$75,000
- Community Development
  - Organize a "Know Solar" educational event for citizens and the construction community to raise awareness about process, costs, and pay back.
    - Cost: Staff time with HC3, \$200
  - o Become SolSmart certified beyond the current Bronze level. Streamline the solar permit process. Coordinate with county and fire departments (solar permits are reviewed and approved by these entities as well as TOF).
    - Cost: Staff Time
- Implement 100% Renewable Plan
  - Cost: TBD

#### **Building Energy Sector**

- Public Works
  - Continue use of used oil burner to heat shop which will reduce electrical and natural gas use.
    - No cost already in use
  - Perform energy audit on all Town buildingsin progress.
    - Free program
  - Continue changing out all lighting to LED (90% complete). Change out all holiday lighting to LED to reduce electrical use thus reducing GHG.
    - Cost: \$20,000
  - Evaluate solar options on town buildings and facilities or join a program to buy solar from Xcel.
    - Cost: TDB
  - o Purchase energy star appliances and low flow fixtures.
    - Cost: TBD as needed
  - o Weather stripping on all facilities replaced on an on-going basis
    - Cost: \$1000/year

#### • Community Development

 Adopt an "Above Building Code" to incentivize/require higher standards to move construction industry to sustainable site planning and building practices that improve comfort, increase water and energy efficiency, and provide money-savings to residents.

Cost: Staff time

#### <u>Transportation Sector</u>

- Public Works
  - Transition vehicle fleet to hybrid or electric (when practical for the intended use) as they are replaced according to the established replacement cycles.

- Cost: \$2,500-\$7,000 increase in vehicle costs/ approx. \$20,000 - \$30,000 up front for infrastructure/ special maintenance tools, equipment and training.
- o Conversion of or purchase of vehicles to propane or natural gas.
  - Cost: TBD with greater analysis of fleet
- Continuing the current replacement schedule as newer vehicles are more efficient and produce less emissions.
  - Cost: TBD with greater analysis of fleet
- o Purchase of vehicle tracking system / software to monitor driving habits and vehicle idle time thus reducing fuel use and emissions.
  - Cost: \$50,000
- Recreation and Culture
  - o Evaluate options for a Frisco-specific bus/shuttle system in place.
    - Cost: TBD and Staff time
  - o Review policy for Class 1 E-Bike use (vs. Class 2) and install pathway signage, rules, and bike parking.
    - Cost: \$1,000 and Staff time
  - o Provide adequate bike parking and bike lockers in appropriate areas to spur greater multi-modal mobility around town.
    - Cost: TBD and Staff time
  - o Post links to alternate transportation options on all lodging, or activity websites. By posting options on all websites people can see what all the county offers for transportation, and might be more inclined to leave their cars at home.
    - Cost: Staff time

#### Events

- o Bike Valets- BBQ & 4th of July Encourage locals and visitors to ride their bikes to these busy events by providing a safe place to store their bikes, while at the event and support by soliciting volunteers from non-profits through the non-profit partnership application.
  - Cost: Pay non-profit \$1,000/ event day for total annual cost of \$3,000 and equipment costs could be about \$500 in labor and transportation if we can just borrow bike racks from Copper (use ski

racks) and use our own barricade fencing

#### Green Team

- o Increase "got gas" employee awards to 2011 rates of \$50.00 per award to increase participation with the goal of decreasing Town of Frisco greenhouse gas emissions.
  - Cost: \$2,000 + staff time to track numbers

#### • Community Development

- Consider removing minimum parking standards for private development by using transportation demand management strategies and tactical urbanism to test use of existing paved areas for parking.
  - Cost: Staff time
- o Implement the trails master plan, including commuter connections with bike paths and sidewalks (consider prioritizing multimodal improvements over new car-oriented improvements).
  - Cost: Project type and size will dictate costs

#### **Waste Sector**

- Recreation and Culture
  - Require individuals who rent out their homes to vacationers to have information about Summit County's water being safe to drink from the tap. This could help reduce the amount of plastic water bottles being purchased by visitors.

- Cost: Staff time
- Provide seasonal PRA staff with a re-usable mug for daily use to reduce single-use product consumption.
  - Cost: \$50/year

#### Events

- o Zero Waste effort at 4th of July and Fall Fest- It is difficult to get volunteers on July 4<sup>th</sup> so the recommendation would be to hire waste sorters who would take the collected trash and sort out recycling and compost on the back end of the event to increase our diversion rate for that day. Cost-\$8,000+ for July 4<sup>th</sup> It would be possible to use non-profit volunteers for Fall Fest, which is a shorter event on a non-holiday Saturday in September.
  - Cost: \$2,000
- Provide a discount on food and beverage for attendees who bring their own reusable cups and silverware to Town sponsored events, therefore reducing waste from single use items.
  - Cost: varies depending on incentive
- Mandatory three stream waste receptacles (landfill, recycle and compost) in all municipal buildings, both back of house and public facing.
  - Cost: \$20,000 (\$15,000 for initial cost of new bins and adequate

signage and \$5,000 annually for additional pick-ups) This is also a goal of the 1A Waste Reduction Task Force, and there could be some funding available through them to execute this.

#### Green Team

- Implement "Boomerang Bag" intended to distribute reusable bags throughout Frisco for use by locals and visitors who don't have reusable bags.
  - Cost: Budgeted in 2019 at \$1,500
- o Adopt a plastic bag ban in Frisco.
  - Cost: Staff time for ordinance work and community outreach

#### Marketing

- New Town Hall dumpster enclosure to increase recycling and composting by decreasing contamination.
  - Cost: 2019 budget is \$65,000
- o Single use water bottle reduction initiative
  - Cost: 2019 budget is \$45,000

#### **Forests Sector**

- Public Works
  - Reuse our own wood chips from our dead fall / forest clearing programs on Town landscaping = less emissions from hauling.
    - Cost: Savings potential
  - o Implement forest care program, especially at PRA, consider a community tree transplant program to thin young saplings, increase forest health, add shade to properties, and sequester CO2.
    - Cost: Staff time and \$2,000/year

#### Recreation and Culture

- All Rentals and activities are signed electronically with no more paper rental waivers.
  - Cost: Staff time and savings potential

#### • Community Development

- Evaluate land use code provisions regarding tree type and number required in landscaping
  - Cost: Staff time
- o Set goals for maintaining forest and tree canopy.
  - Cost: Staff time
- o Expand the use of the county's Transferable Development Rights (TDR) program by encouraging the towns of Dillon, Frisco and Silverthorne to use TDRs as a tool for protecting forested lands from development.
  - Cost: Staff time

#### Sustainable Community/Other

Public Works

- Continue to install meters on all Town irrigation. Continue with web based irrigation control systems and install flow sensors/ alarms. Continue with the thought of reducing water use on turf by 20% - 30%. Less water = less energy use.
  - Cost: \$20,000 \$30,000
- Generate and rotate our own compost piles for the creation of topsoil = less emissions from hauling.
  - Cost: Savings potential
- o Continue to use milled asphalt where applicable.
  - Cost: Savings potential
- o When doing new paving projects, spec reclaimed asphalt paving (RAP) to be used on all paving in Town. Use of a 20% RAP mix can reduce GHG by 15% and reduce fuel use by 15%. WE can use up to a 40% RAP mix and still get a reliable product. Local asphalt producers are capable of this mix.
  - Cost: \$5-\$6 more per cu/yd
- Install fixed based water meter monitoring system less water use = less energy needs
  - Cost: \$60,000 \$75,000 in progress
- o Perform energy audits on water facilities (already scheduled) to find inefficiencies and fix issues. Less heat loss = less energy use.
  - Cost: No cost for now through existing program
- o Continue implementing measures in the WEP to reduce water demands. Less demand = less production = less energy use = less GHG emissions.
  - Cost: \$150,000 \$175,000 per year
- o Increase participation in the "Slow the Flow" by 50% over 2018 numbers. Advertise opportunity to participate in new Indoor Water Audit, and "Start at the Tap" (fixture rebate) programs.
  - Cost: Staff Time and \$2,000 (budgeted in 2019)

#### Events

- Town Clean Up Day- Provide space for any environmentally friendly organization to have educational booths and raise awareness for their organization and their strategies. E.g., HC3, Bear Aware, FDRD, Continental Divide Land Trust)
  - Cost: Staff time for coordination

#### Green Team

- o Similar to the wellness reimbursement program for employees, incentivize employees to make environmentally friendly choices with a "sustainability reimbursement". This could help employees offset the cost of programs that they would undertake at home, such as home composting; upgrading windows or appliances to be more energy efficient; insulation to help reduce heat costs; or purchasing a commuter bike for getting around town.
  - Cost: \$300 per full time year round employee per year \$30,000
- o Instate a Town of Frisco "close the loop" purchasing policy, setting guidelines to purchase locally-sourced or recycled products when

available and of equal quality. E.g., Parks Division would buy compost from the Summit County Resource Allocation Park.

Cost: Variable

o Xeriscape the medians on Summit Boulevard in order to reduce the need for maintenance and mowing with the goal of decreasing CO emissions and water use and increasing staff safety.

Cost: \$40,000

o Sustainability policy and pledge for all employees.

Cost: Staff time

#### Marketing

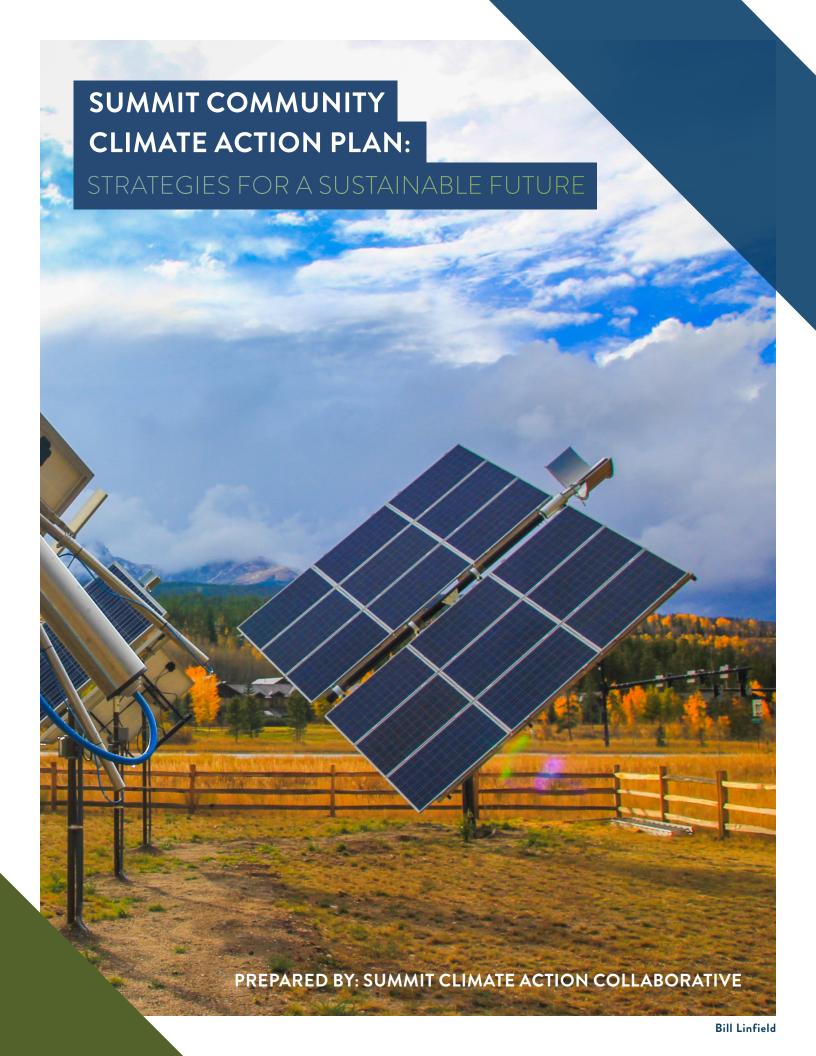

- o Communicate and market the Town's Climate Action Plan involvement and strategies.
  - Cost: \$15,000-\$25,000 per year depending on the scope of the initiatives each year

#### • Community Development

- Evaluate land use code provisions in the following areas and amend as directed by council.
  - Regarding increasing density where appropriate to incentivize and encourage development of multi-family and work force housing to ensure that a work force may reside in Frisco to support the economy and minimize commuting.
  - Regarding the provision of smaller lot sizes and ways to incentivize ADUs, including a "How to Build an ADU" community outreach.
  - Regarding landscaping requirements (quantity and type) to synchronize land use code and water plan goals. Consider landscape zones (plant types in same areas in landscape) and species types to minimize water use, limits to turf use, and outdoor water use meters.

#### Cost: Staff time

- o Create community outreach program through speakers, small community-oriented events, promotion, video, social media, etc., to spread greater awareness about the tenants of community sustainability and what it means to Frisco. Topics could include workforce housing, multi-modal transportation options, waste reduction, water conservation, renewable energy, historic preservation, social equity, and other key topics.
  - Cost: Staff time and \$2,000/year for stipends, materials, media costs, etc.

# VISION STATEMENTS

# WE BELIEVE THAT OUR COMMUNITIES WILL...

- be powered in ways that protect our vibrant mountain resources.
- maximize energy efficiency and lead in green design.
- design multi-modal transportation systems that discourage fossil fuel consumption.
- conserve natural resources through striving for zero waste.
- value healthy forests and understand their beneficial climate and environmental impacts.
- inspire residents and visitors to reduce emissions through outreach and leadership.

# SUMMIT COUNTY, LIKE ALL COMMUNITIES ACROSS THE WORLD, WILL BE IMPACTED SIGNIFICANTLY BY THE EFFECTS OF CLIMATE CHANGE.

Our way of life relies on the very environment in which we are located—the beautiful Rocky Mountains – and we recognize our responsibility to take a leading role in mitigating climate change. Average temperatures in Colorado have increased 2 degrees Fahrenheit over the past 30 years, with an additional 2 to 5 degrees warming expected by 2050.¹ These changes will affect the quality and length of ski seasons, and a change in visitation patterns would drastically affect our local economy and lifestyle.

Realizing our collective responsibility to mitigate greenhouse gas emissions and do our part to prevent climate change, High Country Conservation

Center (HC3) convened the Summit Climate

Action Collaborative in 2018. The Collaborative hired Lotus Engineering and Sustainability, LLC (Lotus) to support the development of the Summit Community Climate Action Plan and complete an initial community-wide greenhouse gas inventory for 2017. As with many communities,

emissions in Summit County are largely generated through energy use in buildings (65 percent) and transportation (33 percent). Lotus also worked with the Collaborative to help us understand strategies for reducing emissions, which were then modeled for greenhouse gas emission reduction potential.

The Collaborative group acknowledges that we do not yet have perfect solutions to reach the plan's goals. However, we strongly believe in the ability of our community to work together to implement the strategies identified in this Climate Action Plan and make our vision of a sustainable Summit County a reality. We look forward to engaging residents, businesses, and visitors in these efforts. Moving forward, HC3 and the Collaborative members will work with each of the municipalities in Summit County to ensure this plan is adopted and supported within each jurisdiction. The Collaborative will also publish a progress report on the Climate Action Plan on an annual basis. Further, HC3 will complete an updated greenhouse gas emissions inventory every three years to determine whether we are on-track to meet our goals.

#### CLIMATE ACTION PLAN SECTORS

#### OUR COMMITMENT TO CURRENT AND FUTURE GENERATIONS

# **REDUCE EMISSIONS 50% BY 2030 AND 80% BY 2050**

To achieve our emissions reduction goals, the Collaborative members identified impactful strategies to reduce our community's emissions. While the strategies selected are not projected to fully realize these goals, we remain committed to identifying additional strategies and technologies that can further help us reduce our emissions in the coming years.

Within the Climate Action Plan, emissions reduction strategies are grouped by the sector that they impact most directly. A brief description of the goals and key strategies within each sector are provided in the following pages.

# RENEWABLE ENERGY SECTOR

**VISION:** Our communities will be powered in ways that protect our vibrant mountain resources.

**SECTOR GOAL:** Reduce emissions from electricity use 100 percent by 2035.

Our community-wide commitment to 100 percent renewable energy builds on existing initiatives from Arapahoe Basin, Summit County Government, the Town of Breckenridge, and Vail Resorts. By establishing a common goal across the county, our communities can work together to ensure we uphold our individual and mutual commitments.

#### **KEY STRATEGIES**

- Encourage all jurisdictions to adopt or support renewable energy goals and work with utilities to achieve these goals.
- Advocate at the state and local level for a rapid increase in the amount of renewable energy on the grid.
- Increase education about renewable energy and make it easier to install renewable energy on homes and businesses.

# **BUILDING ENERGY SECTOR**

**VISION:** Our communities will maximize energy efficiency and lead in green design.

**SECTOR GOAL:** Reduce emissions from building energy use 21 percent by 2030 and 36 percent by 2050.

Through a combination of policies, education, and financial tools, we will ensure that residents, businesses and visitors benefit from more energy efficient and healthier buildings.

#### **KEY STRATEGIES**

- Adopt and enforce the most updated version of the International Energy Conservation Code for buildings and develop an above-building-code standard for new construction.
- · Require energy reporting for large commercial buildings.

## TRANSPORTATION SECTOR

**VISION:** Our communities will design multi-modal transportation systems that discourage fossil fuel consumption.

**SECTOR GOAL:** Reduce emissions from transportation 25 percent by 2030 and 91 percent by 2050.

To significantly reduce emissions in the transportation sector, our communities will ensure that multimodal connectivity and access are key considerations in community growth and expansion, increase the use of public transit systems, and support the adoption of electric vehicles. These actions will also have additional positive community impacts such as improved air quality through less tailpipe pollution, reduced congestion, and an improved visitor experience.

#### **KEY STRATEGIES**

- Support the adoption of more electric vehicles through expanded infrastructure and incentives.
- Provide incentives to use public transit within Summit County.

# **WASTE SECTOR**

**VISION:** Our communities will conserve natural resources through striving for zero waste.

**SECTOR GOAL:** Reduce emissions from waste 50 percent by 2030 and 90 percent by 2050.

Summit County will expand waste reduction and recycling programs, encourage less consumption and more re-use, and make recycling and composting easy and economical for all residents and business owners. By doing this, our communities will reduce the use of natural resources and increase the landfill diversion rate.

#### **KEY STRATEGIES**

- · Adopt a Save-As-You-Recycle ordinance across the county.
- · Work with waste haulers to implement a curbside food scrap collection program.

# **FORESTS SECTOR**

**VISION:** Our communities will value healthy forests and understand their beneficial climate and environmental impacts.

**SECTOR GOAL:** Maintain forest cover in Summit County and improve forest resilience to climate impacts.

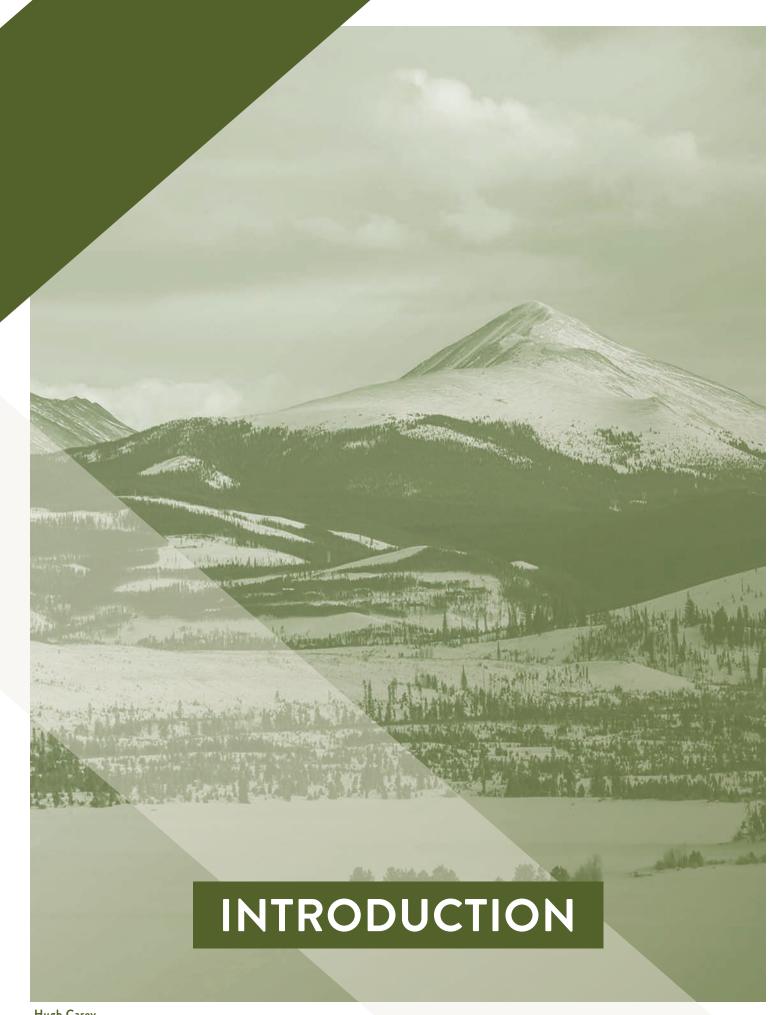

In recent years, the county has seen an uptick in forest fires, and a warmer climate also increases the risk of

pest infestation. Finding ways to improve the health of Summit's forests in the face of a changing climate can reduce these risks, while also preserving the trees' capacity to store carbon.

#### **KEY STRATEGIES**

- Improve the understanding of forest health in a changing climate.
- Educate and advocate for the important role of forests with regard to climate change.

**SUMMIT COUNTY IS AN AMAZING AND BEAUTIFUL PLACE.** Our community is home to four internationally recognized ski resorts, year-round outdoor activities that attract millions of visitors annually, and stunning national forest. As a resort community heavily dependent on our natural resources, Summit County already has been and will continue to be significantly impacted by the onset of climate change.

Average temperatures in Colorado have increased 2 degrees Fahrenheit over the past 30 years, with an additional 2 to 5 degrees Fahrenheit warming expected by 2050.<sup>2</sup> In the fall when ski areas rely on snowmaking to cover the slopes, nighttime low temperatures are rising at a fast rate, delaying early season snowmaking and making it less efficient. At the end of the season, snow is melting 15 – 30 days earlier than in the late 1970s, cutting ski season short. <sup>3</sup> Springtime snowpack levels have decreased at most monitoring sites

# **DID YOU KNOW?**

Because of increased temperatures, water flow in the Colorado River is anticipated to reduce up to 40 percent by 2100.6

since 1955, and most projections for the state's river basins show decreasing annual runoff and less overall water supply.<sup>4</sup> Even the trees are feeling the heat. Summit County's forests have been especially affected by the mountain pine beetle – leaving our community at risk of significant fire danger and erosion.

If worldwide greenhouse gas emissions are not curtailed soon, Summit County could experience increased drought, heat, fire danger, and significantly more winter precipitation falling as rain rather than snow. In 2010, Colorado hosted 12 million skier visits (approximately 20 percent of total United States skier visits) which accounted for 37,000 employees earning \$1.2 billion in wages and contributed \$2.2 billion in value to the Colorado economy. A reduction in skiers and winter tourists due to decreased snow pack could drastically affect our local economy and lifestyle. Lastly, a growing population across the state and in Summit County will place increased pressure on water supplies and could create conflict between water-intensive industries like recreation, agriculture, and municipal use.

## A COMMUNITY EFFORT

This Climate Action Plan is a continuation of work undertaken in 2015 through Xcel Energy's Partners in Energy program. Through Partners in Energy, we laid the foundation for the Summit Climate Action Collaborative and created our community's first-ever greenhouse gas reduction goals. Other foundational documents include the 2009 Frisco CleanTracks Plan, the 2011 SustainableBreck Plan, and the 2011 Summit County Energy Action Plan. This Climate Action Plan builds upon that work by establishing larger goals and mapping out additional actions needed to create a more sustainable and resilient future.

#### **EXPERT GROUPS**

The planning process included input from five subject-specific expert groups. These groups included building energy, mobility

and transportation, water and sanitation, forests, and public engagement. The expert groups generated and prioritized sector-based emissions reduction strategies for further consideration by the Collaborative members.

# VOICES FROM THE COMMUNITY

"Climate change is important to me because I've seen the climate changes first-hand in the 25 years I've lived in Summit County. It's concerning to think what the next 25 years will look like."

– Citizen Comment –

#### SUMMIT CLIMATE ACTION COLLABORATIVE

Over a six-month period, the members of the Summit Climate Action Collaborative were charged with further refining the strategies, setting targets and overarching greenhouse gas reduction goals, and creating vision statements for the Climate Action Plan. The Collaborative is committed to working together to achieve the plan's goals and will share responsibility for implementing the strategies outlined in the plan. High Country Conservation Center serves as the facilitator for this group.

Moving forward, each year the Collaborative will report publicly on the progress of this Climate Action Plan. In addition, HC3 will measure greenhouse gas emissions every three years to ensure that we are reducing emissions at the rate needed to achieve our goals.

OUR GOAL IS TO REDUCE COMMUNITYWIDE EMISSIONS 50% BY 2030 AND 80% BY 2050.

### WHY MORE ACTION IS NEEDED

Climate action is not new to Summit County. Our local citizens, municipalities, and companies have been working to decrease greenhouse gas emissions for several years, and we recognize that a stable climate is essential to ensure a vibrant, healthy, and economically viable future for Summit County.

Between 2017 and 2018 alone, communities and businesses in Summit County have made great strides in local climate action including:

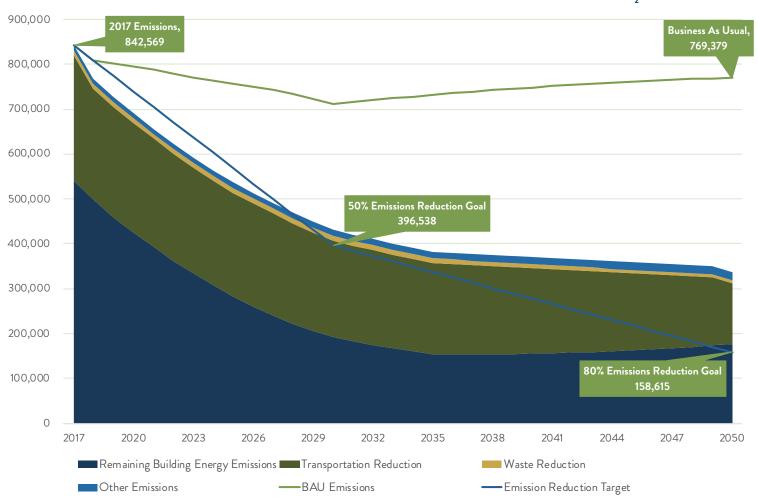

- Summit County and the Town of Breckenridge committed to communitywide 100 percent renewable electricity by 2035.
- Vail Resorts, Inc. owner of Breckenridge and Keystone Ski Resorts announced its Commitment to Zero which includes zero net emissions by 2030, zero waste to landfill by 2030, and zero net operating impact on forests and habitat by 2030.
- Arapahoe Basin announced its goals to achieve carbon neutrality, a 75 percent waste diversion rate, and
   100 percent renewable electricity all by 2025.
- Summit County voters passed a property tax to increase funding for waste reduction programs.
- The towns of Breckenridge and Frisco and Summit County Government joined the Compact of Colorado Communities, a consortium of local governments committed to addressing the impacts of climate change.

**VOICES FROM** 

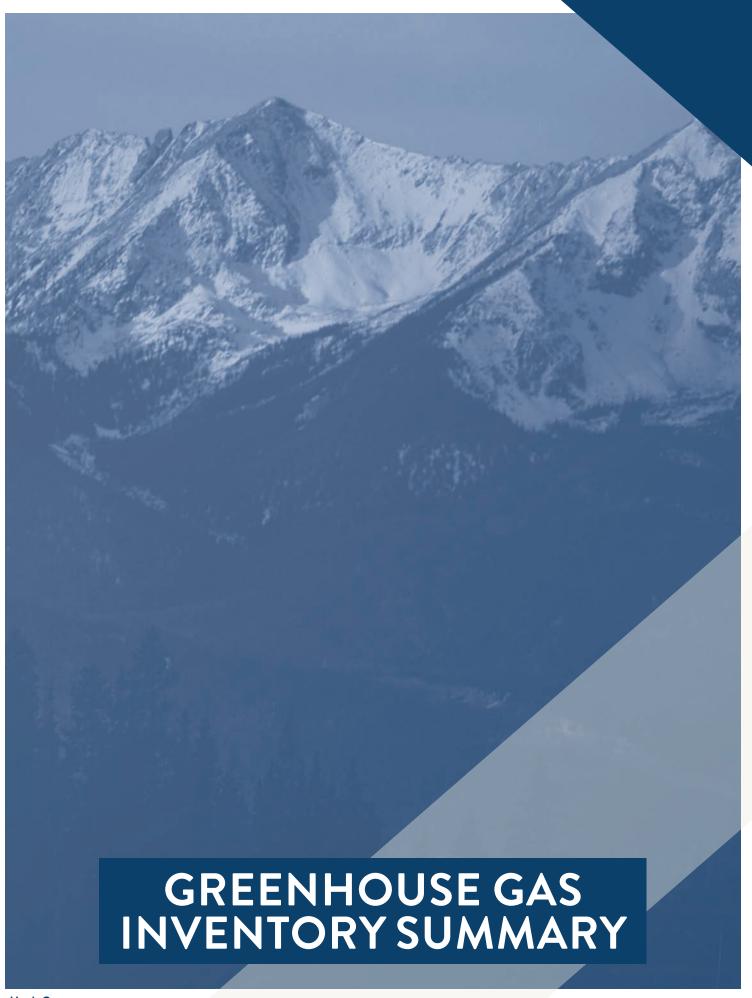

Yet without further action, the community's greenhouse gas emissions will decrease only 3 percent by 2050. This decrease is due to Xcel Energy's greenhouse gas reduction targets, which are included in the Business As Usual scenario shown in Figure 1. Building upon its commitment to providing 55 percent renewable energy by 2026, Xcel plans to reduce carbon emissions 80 percent by 2030 and to deliver zero-carbon electricity by 2050. In addition, the business-as-usual scenario includes the recently announced low-emission vehicle standards signed by Governor Hickenlooper in 2018.<sup>7</sup> Despite Xcel Energy's announcement and future low-emission vehicle standards, Summit County's emissions are anticipated to stay relatively flat due to expected increases in population, development, and visitation.

FIGURE 1: GHG REDUCTIONS FROM STAKEHOLDER STRATEGIES (MTCO,e)

<sup>&</sup>lt;sup>7</sup> David Migoya. (2018). Colorado Will Adopt California-Style Low-Emission Vehicle Standards Under Hickenlooper Order. The Denver Post. https://www.denverpost.com/2018/06/19/colorado-california-emission-vehicle-standards/

# GREENHOUSE GAS INVENTORY SUMMARY

In 2018, the Summit County community completed its first greenhouse gas inventory to better understand our emissions profile and to give insight to policies and programs that could help reduce emissions in our region.

The data indicate that our communities have unique challenges in terms of greenhouse gas emissions. For example, Summit County is among the most visited ski destinations in the world. Peak seasonal daily population is nearly 150,000 people – a stark increase over the year-round resident population of approximately 30,000.8 With millions of tourists visiting our community each year, it's likely that tourism has a larger impact on emissions than our year-round resident population.

### **DID YOU KNOW?**

Flying from New York to Los Angeles (5,000-miles round-trip) produces more than two metrics tons of carbon dioxide. Based on U.S. averages, you generate the same amount of emissions after driving your car for five months.

#### The following are a few key takeaways from the inventory:

- 842,569 metric tons of carbon dioxide equivalent ( $MtCO_2e$ ) were produced in 2017. This is equal to the emissions from 179,000 cars driven for a year.
- As shown in Figure 2, more than half of emissions are generated in unincorporated areas of Summit County,
  followed by the larger towns of Breckenridge, Silverthorne, and Frisco. The high level of emissions in unincorporated
  Summit County is driven by two main factors: These areas are where more than half of the county's full-time
  residents live and where most ski areas' energy use occurs.
- The majority of Summit County's emissions arise from three sectors: commercial energy, residential energy, and transportation (see Figure 3).
- As shown in Figure 4, the single largest source of emissions is electricity, followed by natural gas and mobile gasoline. In 2017, approximately 28 percent of electricity came from renewable resources.

FIGURE 2: EMISSIONS BY MUNICIPALITY, 2017

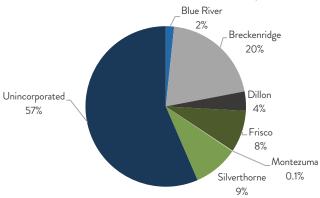

FIGURE 3: EMISSIONS BY SECTOR, 2017

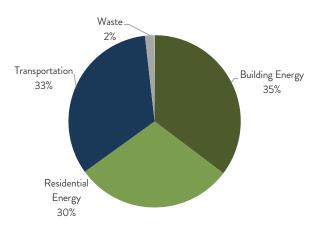

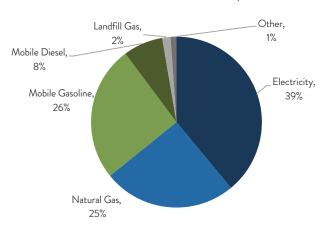

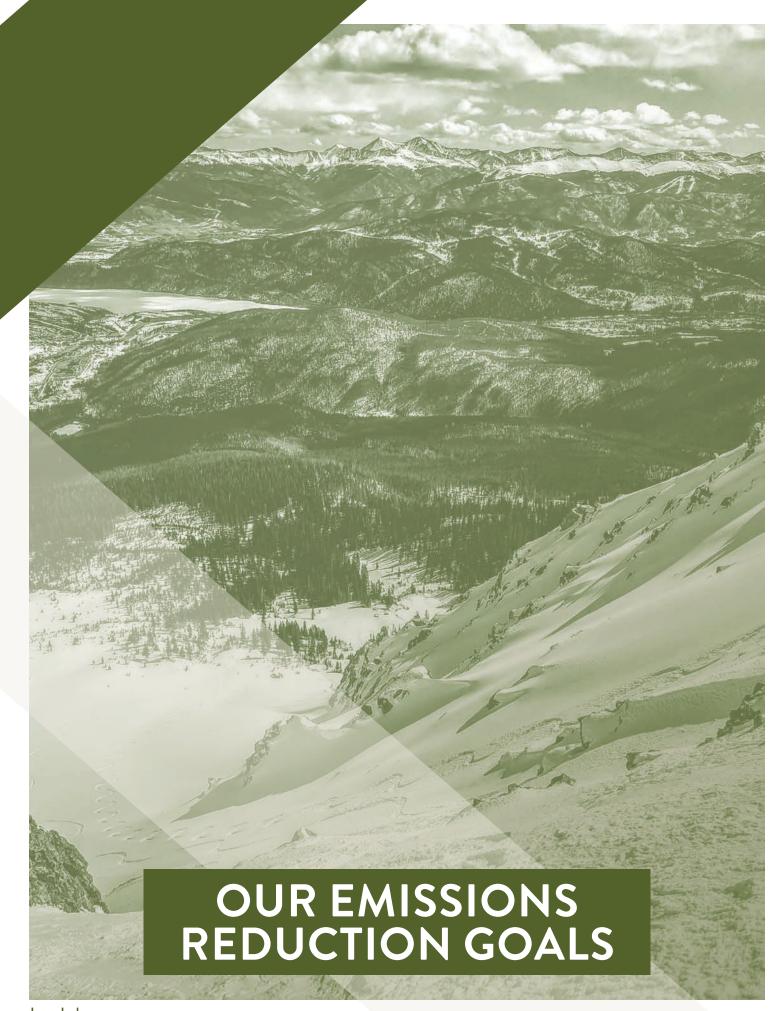

FIGURE 4: EMISSIONS BY SOURCE, 2017

#### **FORESTS**

In addition to emissions from energy, transportation, and waste, Summit County's forests play a role in the overall carbon budget of the county. On the plus side, preliminary estimates for the years 2001-2011 suggest the county's forests sequester (that is, capture and store) around 10 percent of emissions from other sectors. However, there are emissions when development such as buildings, roads, or recreational areas result in a permanent loss of forest area. Emissions also occur from disturbances such as insects and fire, which may be temporary if the forest is restored. Forest greenhouse gas estimates will be updated in 2019 when new data becomes available.

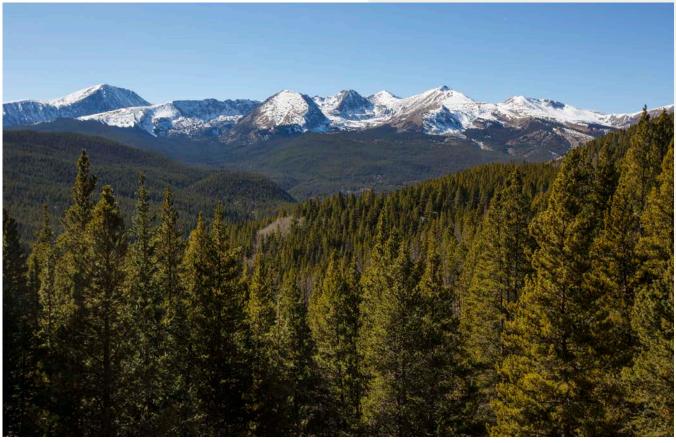

### Our goal is to reduce greenhouse gas emissions 50% by 2030 and 80% by 2050 over a 2005 baseline.

Many of the Collaborative members hope that we can achieve these goals sooner than the target years we have chosen. While the strategies outlined in this plan include actions necessary to meet our community goals, the Collaborative also recognizes that changes and innovations in technology and the economy over the coming years may make new strategies applicable to our community. We remain open, engaged, and informed of additional opportunities to drive greater emissions reductions.

The strategies that follow are divided into the sectors they impact: 1) Renewable Energy, 2) Building Energy, 3) Transportation, 4) Waste, 5) Forests, and 6) Community Engagement. Throughout each section, strategies are listed in order of potential impact on emissions reductions, with the first strategy listed having the highest potential impact. Additionally, we have a set of strategies for Community Engagement, which, while not necessarily driving emissions reductions directly, will ensure greater success of our Climate Action Plan through engaging and empowering our whole community to participate. The Collaborative will begin implementing several of the plan's strategies in 2019, while others have a longer-term timeline.

Together, if all the strategies are implemented, the Summit County community could reduce emissions 60 percent by 2050 based on a 2005 baseline. In order to achieve our goal of reducing emissions 80 percent by 2050, will need to find cost-effective ways to decrease our dependence on natural gas heating.

**Hugh Carey** 

#### RENEWABLE ENERGY

**VISION:** Our communities will be powered in ways that protect our vibrant mountain resources.

**SECTOR GOAL:** Reduce emissions from electricity 100 percent by 2035.

#### **DID YOU KNOW?**

Enough solar energy hits Colorado to power approximately 360 times the state's current electricity needs. 9

#### WHERE WE ARE NOW

Currently, over 99 percent of the electricity used in Summit County is provided by Xcel Energy (Xcel). The remainder of homes and businesses are served by Mountain Parks Electric. In 2017, Xcel's energy mix consisted of 28 percent renewable resources. In the coming years, Xcel plans to rapidly increase the amount of renewable electricity on its grid, primarily from large-scale wind farms in the eastern

plains of Colorado, as well as large solar installations. The company has committed to generating 55 percent renewable electricity by 2026 and zero-carbon electricity by 2050 (see Figure 6 and Figure 7).

**FIGURE 6: 2017 XCEL ENERGY MIX** 

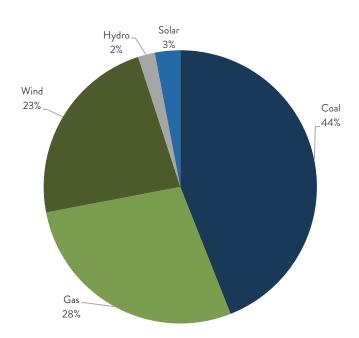

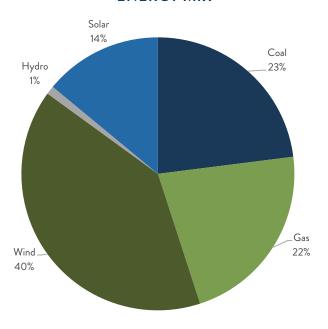

FIGURE 7: 2026 XCEL PROJECTED ENERGY MIX

<sup>9</sup> Solar Energy Industries Association. Top Ten Solar States. https://www.seia.org/research-resources/top-10-solar-states

As shown in Figure 8, the demand for electricity in our communities is expected to rise. This projected increase is due to several factors, including:

- · population growth, leading to more homes and businesses needing power;
- · increased use of electric vehicles;
- · increased snowmaking by the ski areas;
- · increased demand for air conditioning during the summer months; and
- · increased electric heating.

1,200,000 200,000 180,000 1,000,000 160,000 140,000 800,000 120,000 600,000 100,000 80,000 400,000 60,000 40,000 200,000 20.000 0 0 2017 2020 2023 2026 2029 2032 2035 2038 2041 2044 2047 2050 **YEARS** ■ Expected Demand in Buildings (MWh) Additional Electricity Demand from Electric Vehicles (MWh) Additional Electricity Demand from Fuel Switching (MWh) — Total Electricity Demand (MWh) Emissions from Electricity (MtCO2e)

FIGURE 8: PROJECTED ELECTRICITY DEMAND

#### WHERE WE ARE HEADED

This community-wide commitment builds on existing initiatives within the county. Arapahoe Basin set a goal to be carbon neutral by 2025. Vail Resorts committed to 100 percent renewable electricity by 2020 and plans to be carbon neutral by 2030. The Town of Breckenridge committed to 100 percent renewable electricity for municipal operations by 2025 and 100 percent renewable electricity for the entire community by 2035. Summit County Government also set a goal of 100 percent renewable electricity by 2035. By establishing a common goal across the county, our community can work together to ensure we uphold our individual and mutual commitments. While renewable electricity goals are important to our community, they do not address emissions from natural gas use. To meet our goal, we need to decrease our reliance on natural gas as a heating fuel.

#### UNIQUELY SUMMIT COUNTY

- Summit County receives an average of 245 days of sunshine a year.
- In 2017, locally produced solar and wind systems within Summit County's borders accounted for less than one percent of community electricity use.

#### RENEWABLE ENERGY STRATEGIES

- · Encourage all jurisdictions to adopt or support renewable energy goals.
- · Advocate at the state level for a rapid increase in the amount of renewable energy on the grid.
- · Develop a local renewable energy roadmap and/or feasibility study to ensure that we maximize the use of our local solar and wind resources.
- · Execute a community campaign to increase solar installations through education and bulk purchase programs.
- · Streamline the permitting process for renewable energy systems.
- · Collaborate with utilities to achieve the goals of this plan.

#### **BUILDING ENERGY**

## **VISION:** Our communities will maximize energy efficiency and lead in green design.

**SECTOR GOAL:** Reduce emissions from building energy use 21 percent by 2030 and 36 percent by 2050.

#### **DID YOU KNOW?**

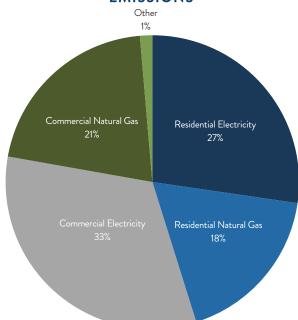

In 2016, electricity use accounted for 28 percent of the United States' total emissions.<sup>10</sup>

#### WHERE WE ARE NOW

In 2017, buildings and ski area energy use in Summit County accounted for two-thirds of the community's emissions. Commercial buildings have slightly higher total emissions than residential buildings. The majority of building energy emissions comes from the use of electricity in buildings to power lights and other building systems. This is followed by the use of natural gas, primarily for heating. A small share of emissions result from diesel and propane used in generators and heaters (see Figure 9).

The Renewable Energy section of this report discussed the significant greenhouse gas impact of a clean and renewable-powered electricity grid. However, to achieve our goals, our community must decrease the use of natural gas, propane, and stationary diesel.

As a resort community, we experience massive population fluctuations throughout the year, and over two-thirds of homes are second homes. In addition, Summit County has dozens of hotels and energy-intensive tourism and recreation facilities. Together, this creates a unique set of challenges that requires a creative approach to reducing building energy emissions.

#### WHERE WE ARE HEADED

Through a combination of policies, education, and financial tools, we will ensure that homeowners, businesses, and visitors to our community are able to take advantage of the benefits of more energy efficient and healthier buildings. We have identified a set of strategies that will ensure we continue to reduce energy consumption in existing buildings and incorporate the most innovative green building standards into new developments.

While the strategies listed here cover a wide range of actions and will reduce community emissions significantly, we recognize that technological improvements in the coming years and a rapid transition to a renewable electricity grid may offer further opportunities to reduce building energy emissions.

#### **UNIQUELY SUMMIT COUNTY**

- Over one-third of homes in Summit County are heated with electricity. As we transition to 100 percent renewable electricity, these buildings will essentially become carbon-free.
- 68 percent of homes in Summit County are second homes.

#### **BUILDING ENERGY STRATEGIES**

The building energy sector strategies are organized by residential building strategies, commercial building strategies, and strategies that impact all buildings.

#### RESIDENTIAL BUILDING STRATEGIES

- Explore the feasibility of requiring all new residential construction to be heated with electricity as there are no carbon-free alternatives to natural gas or propane.
- Develop a homeowner association, short-term rental, and second-homeowner energy efficiency program.

  We will develop a program that incentivizes, educates, and supports these property owners to improve their buildings' energy efficiency and install renewable energy.
- Improve and expand existing residential energy efficiency programs to target more homes and gain greater energy savings. Residents in our community can currently participate in Energy Smart Colorado and the Colorado Affordable Residential Energy programs to reduce energy use.
  - **Strategy Target:** Increase the number of homes that have participated in the Energy Smart Colorado program to 30 percent of all homes by 2025 and 55 percent of all homes by 2030.
  - **Strategy Target:** Increase the number of eligible households that have participated in the Colorado Affordable Residential Energy program to 20 percent of eligible households by 2025 and 25 percent of eligible households by 2030.
- · Host LED light bulb giveaways or exchanges for homeowners.

#### **COMMERCIAL BUILDING STRATEGIES**

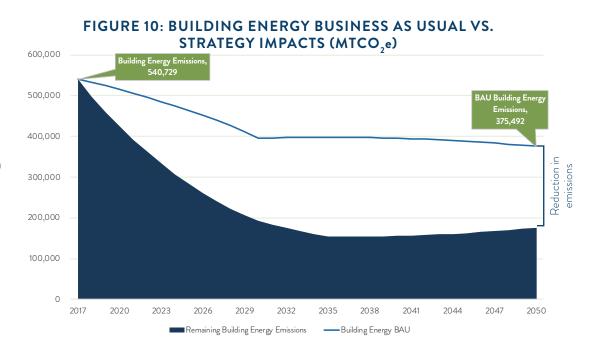

- Amend local codes to require mandatory building retro-commissioning. Retro-commissioning means
  that commercial property owners will assess their buildings' mechanical systems to ensure efficient
  operation.
- · Improve and expand existing commercial energy efficiency programs to target more businesses and gain greater energy savings.
  - Strategy Target: Increase the number of commercial properties that have participated in ResourceWise and similar programs to 30 percent of all buildings by 2025 and 55 percent of all buildings by 2030.

- Adopt local ordinances to require energy reporting for large commercial buildings.
  - Owners of large commercial and industrial buildings will publicly report their energy use on an annual basis. Reporting programs can empower them to make smarter decisions about how their buildings and facilities run.
    - **Strategy Target:** Achieve 80 percent compliance with mandatory reporting for all buildings over 15,000 square feet by 2025.
    - **Strategy Target:** Achieve 100 percent compliance with mandatory reporting for all buildings over 10,000 square feet by 2030.
- Promote energy efficiency and renewable energy for school and government buildings. Our communities will lead by example by promoting and prioritizing energy efficiency and green building in new construction and major renovations of school and government facilities.

#### STRATEGIES IMPACTING ALL BUILDINGS

- · Develop an above-building-code standard for new construction.
- Adopt and enforce the most updated version of the International Energy Conservation Code for buildings. The Summit County community will continue to adopt new international codes every six years.
- · Develop a long-term financing mechanism to provide incentives for reducing energy use and greenhouse gas emissions in buildings.

As shown in Figure 10, by pursuing the above strategies our community will reduce building sector emissions by 21 percent by 2030 and 36 percent by 2050.

# VOICES FROM THE COMMUNITY

- "Commit to renewable resources and support HC3's home and business energy audits."
- "New building codes to mandate solar and energy efficient homes and commercial buildings."

#### **TRANSPORTATION**

**VISION:** Our communities will design multi-modal transportation systems that discourage fossil fuel consumption.

**SECTOR GOAL:** Reduce emissions from transportation 25 percent by 2030 and 91 percent by 2050.

#### **DID YOU KNOW?**

Even though the current electric grid isn't 100 percent carbon free, electric cars produce less than half of the lifetime emissions as conventional gasoline-powered vehicles. <sup>11</sup>

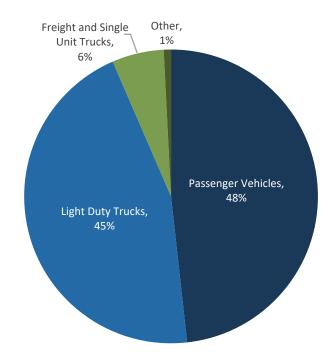

#### WHERE WE ARE NOW

Emissions from transportation activities account for one-third of our total community emissions. Over 90 percent of transportation emissions come from driving gas and diesel-powered cars and trucks.

#### WHERE WE ARE HEADED

To significantly reduce emissions in the transportation sector, our communities will ensure that multimodal connectivity and access are key considerations for community growth and expansion, increase the use of public transit systems, and support the deployment and adoption of electric vehicles. These actions will also have additional positive community impacts such as improved air quality, reduced congestion and an improved visitor experience.

### FIGURE 11: VEHICLE MILES TRAVELED BY VEHICLE TYPE

<sup>11</sup> Steve Hanley. (2018). Electric Car Myth Buster - Well-to-Wheel Emissions. https://cleantechnica.com/2018/02/19/electric-car-well-to-wheel-emissions-myth/

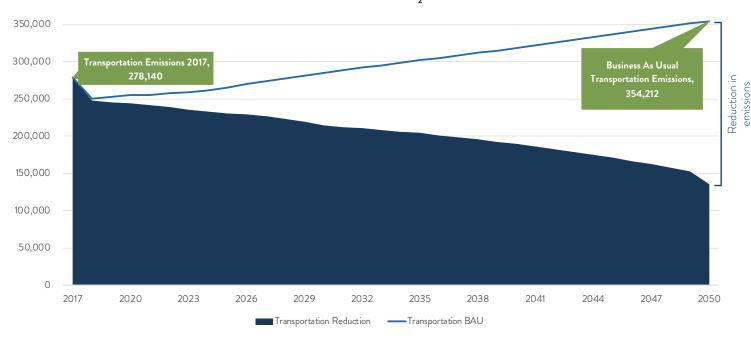

#### TRANSPORTATION STRATEGIES

- · Support the adoption of more electric vehicles through the development of a community-wide Electric Vehicle Readiness Plan, as well as expanded infrastructure and incentives.
  - **Strategy Target:** Increase the share of electric vehicles driving on Summit County roads to 30 percent of all vehicles by 2030 and 60 percent of all vehicles by 2050.
- Switch government fleets to electric vehicles within the replacement cycle and when appropriate models are available. Local governments will train fleet technicians to ensure most maintenance can be performed in-house.
- Promote clean fuels and alternative fueling infrastructure for heavy-duty vehicles. We will work with partner agencies to promote and encourage the development of clean fueling stations for heavy-duty vehicles.
  - **Strategy Target:** Increase the percentage of heavy-duty vehicles using alternative fuels to 30 percent by 2030 and 50 percent by 2050.
- · Discourage single occupancy vehicles through through incentives, policies, and participation in regional initiatives.
- Provide incentives to use public transit within Summit County. Summit County has an expansive and free public transit system available to both residents and visitors. We will work to ensure that transit is easy to access and has routes and time schedules that are convenient for our community and visitors.
  - **Strategy Target:** Increase the ridership of public transit systems in Summit County 50 percent by 2030 and 100 percent 2050 (over a 2017 baseline).
- · Develop a Summit County bicycle and walking master plan.
- · Partner with utilities to ensure grid capacity for increased electric vehicle charging.

As shown in Figure 12, the combined impact of the above strategies is likely to result in a 25 percent reduction in total community emissions by 2030, and a 91 percent reduction by 2050. Additionally, we will continue to explore further opportunities to reduce emissions from the transportation sector through improved technology and innovative projects.

FIGURE 12: TRANSPORTATION: BUSINESS AS USUAL VS. STRATEGY IMPACTS (MTCO<sub>2</sub>e)

#### WASTE

**VISION:** Our communities will conserve natural resources through striving for zero waste.

**SECTOR GOAL:** Reduce emissions from waste 50 percent by 2030 and 90 percent by 2050.

#### **DID YOU KNOW?**

Nationally, Americans compost or recycle 34 percent of our waste. In Summit County, we recycle or compost only 21 percent of our waste. 12

#### WHERE WE ARE NOW

The Summit County Resource Allocation Park (also known as SCRAP) hosts a landfill, recycling processing center, and commercial composting operation. In 2017, Summit County residents and visitors landfilled over 50,000 tons, recycled 5,000 tons, and composted 8,700 tons for a total landfill diversion rate of 21 percent. Waste accounts for only two percent of the community's emissions.

#### WHERE WE ARE HEADED

With the passing of Ballot Measure 1A in 2018, the SCRAP will increase local opportunities for recycling and composting. By encouraging less consumption and more re-use, and making recycling and composting easy and economical for all residents and business owners, our community will reduce emissions and our use of natural resources.

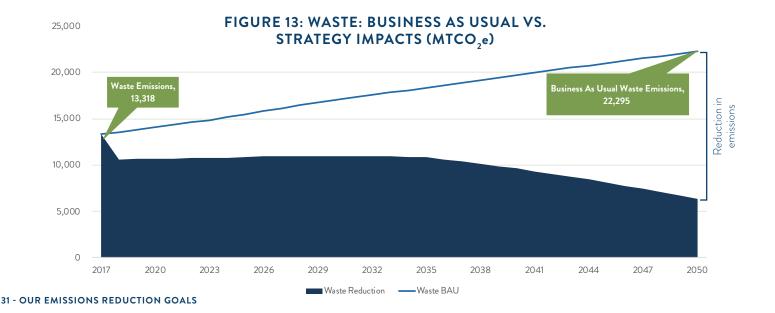

#### **UNIQUELY SUMMIT COUNTY**

- The SCRAP accepts electronic waste and household hazardous waste free of charge for residents.
- When waste decomposes at higher altitudes, it produces less methane than at sea level.

#### WASTE STRATEGIES

- Adopt a Save-As-You-Recycle ordinance
   across the county. Save-As-You-Recycle
   will provide financial incentives for people to
   reduce their landfilled waste by recycling and composting more.
- VOICES FROM THE COMMUNITY
  - "Create a curbside food scrap collection program."
- Consider implementing landfill bans on easily recycled items. For example, in Fort Collins cardboard must be recycled or resused. It is not allowed in the landfill.
- · Work with waste haulers to implement a curbside food scrap collection program.
- · Increase the number of glass collection sites and types of materials accepted at recycling centers.
- · Require new construction to include space for recycling and food scrap collection.
- Create codes to require recycling at new construction sites. Many construction materials can be recycled, reused, or repurposed. We will require all new construction to prioritize recycling and reuse over landfilling the waste that is created on-site.
- · Incentivize deconstruction and reuse instead of demolition in construction and demolition projects.
- · Create local markets and infrastructure for used asphalt and concrete.
- Encourage local governments to demonstrate leadership by providing zero waste stations in all facilities as well as creating and enforcing zero waste event requirements.

As shown in Figure 16, the combined impact of the above strategies is likely to result in a 42 percent reduction in total waste emissions by 2030, and a 90 percent reduction by 2050. Additionally, we will continue to explore new opportunities for recycling and composting to further reduce emissions from the waste sector.

#### **FORESTS**

**VISION:** Our communities will value healthy forests and understand their beneficial climate and environmental impacts.

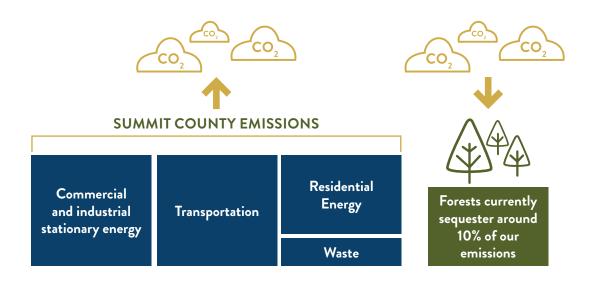

**SECTOR GOAL:** Maintain forest cover in Summit County and improve forest resilience to climate impacts.

#### WHERE WE ARE NOW

Currently, 53 percent of Summit County is forested, sequestering approximately 10 percent of the county's gross emissions. Much of this forest land (roughly 170,000 acres) is managed by the US Forest Service (USFS). Around 15 percent of Summit County forests are outside of federal lands and managed by Summit County Government or local towns or private land owners.

Between 2001 and 2011, our community lost nearly 8,300 acres of live trees. Most of this loss was due to the mountain pine beetle. Federal forest land that is subject to natural disturbance (such as pest or fire) will likely regenerate over time, and the USFS may replant areas to accelerate forest restoration. The USFS also monitors federal forest land after treatment—for example, clear cuts that occur in beetle infected areas to manage fuel load and create defensible space—and ensures forests in such areas are restored in ways that promote safety and forest health.

Over the same time period, there was a loss of over 1,880 acres of non-federal forest. Around 90 percent of this loss was likely due to beetle disturbance, while 10 percent was due to increased development. When forests are cut, this results in the release of greenhouse gas emissions (as the carbon they stored goes to the atmosphere), as well as lost future sequestration—as forests can sequester carbon for long periods of time.

#### WHERE WE ARE HEADED

There are two major trends impacting the forests of Summit County: development and climate change. Through a combination of efforts, the community will strive to maintain its forest and tree canopy cover despite expected growth in population over the coming years. This will require consideration of how to ensure forest areas lost to disturbance are restored, while managing the expected development and expanding urban-rural boundaries in coming years.

#### **DID YOU KNOW?**

A tree can sequester up to 400 pounds of carbon dioxide over 25 years. At that rate, it takes 80 trees 25 years to absorb the same amount of carbon emissions an average American produces in one year.

In addition, Summit County forests will be increasingly impacted by climate change. In recent years the county has seen an uptick in forest fires, and a warmer climate also increases the risk of pest infestation. Finding ways to improve the health of Summit's forests in the face of a changing climate can reduce these risks to our forests.

#### **UNIQUELY SUMMIT COUNTY**

- Summit County citizens appreciate and love forests! The beauty and recreation that the White River National Forest provides is a key reason why people live in Summit County.
- Trees in Summit County grow slowly—
  due to our altitude, precipitation, and
  colder average temperatures—so the
  carbon we lose when cutting down trees
  is not quickly regained. Most of Summit
  County's forests have been storing carbon
  for over a century.
- Summit County and the Town of Breckenridge have active, well-funded
   Open Space and Trails departments, managing and protecting nearly 20,000 acres of land across the county.
- Summit County is one of the first communities in the country to include forests in their GHG inventory and Climate Action Plan, recognizing the important role forests play in regulating our climate.

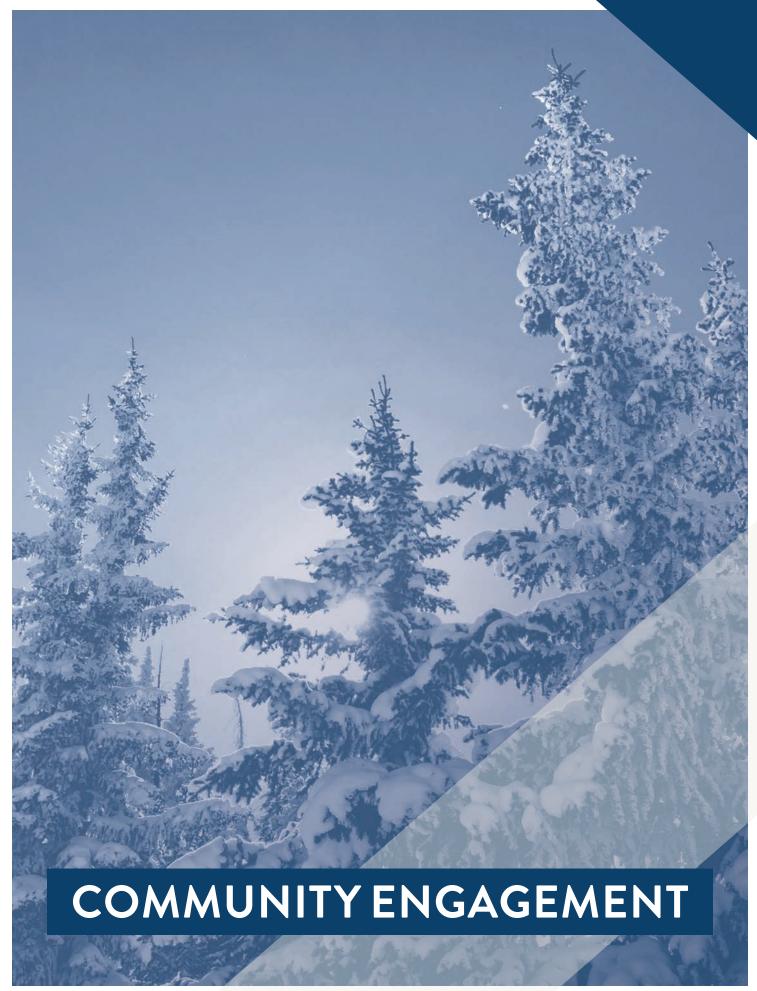

#### **FOREST STRATEGIES**

Develop and implement a community-wide forest
management plan. Many communities have a forest or
tree management plan—not only to create a healthier
environment, but also a friendlier, more beautiful setting.
Increasingly, tree management is seen as a critical piece
of building sustainable communities. A community-wide
management plan could:

# VOICES FROM THE COMMUNITY

- "Incorporate climate change and our forests' health into messaging."
- "Plant new diverse varieties of trees that adapt to our changing climate."
- Encourage municipalities to set goals for maintaining forest and tree canopy.
- Expand the use of county's Transferable Development Rights (TDR) program in the Lower Blue, Snake,
   and Tenmile river basins by encouraging the towns of Dillon, Frisco, and Silverthorne to use TDRs as a tool
   for protecting forested lands from development.
- Develop ways to incentivize tree planting on private property.
- · Increase the number of street trees and reevaluate trees and landscaping in parks.
- · Continue to monitor forest cover on non-federal lands and develop an urban tree inventory.
- Improve the understanding of forest health in a changing climate. Summit County forests are already experiencing the impacts of climate change. More work is needed to understand what measures will best promote healthy forests for generations to come. A local collaborative, the Forest Health Task Force, is dedicated to promoting forest health in Summit County. Actions undertaken may include:
  - Develop a Forest Health Index to monitor factors that affect the health of Summit County's forests and to take action when needed to preserve the many services forests provide to our community.
  - Conduct research on Summit County's forest ecology in a changing climate and better understand how to promote carbon sequestration and health of future forests.
- Educate and advocate for the important role of forests with regard to climate change. While most people who live and visit Summit County appreciate forests for the recreation and beauty they provide, fewer are aware of the role forests play in mitigating climate change. Therefore, Summit County will work to:
  - Educate the community and visitors about the benefits of healthy forests, including the carbon sequestration they provide.
  - · Advocate for forest protection at the federal, state, and local levels.

By taking the steps above, Summit County can expand the ways in which our community values forests. These actions not only "lock up" the carbon stored within our forests, but also ensure that trees continue to sequester carbon well into the future—helping Summit County reach its climate change mitigation goals.

### COMMUNITY ENGAGEMENT

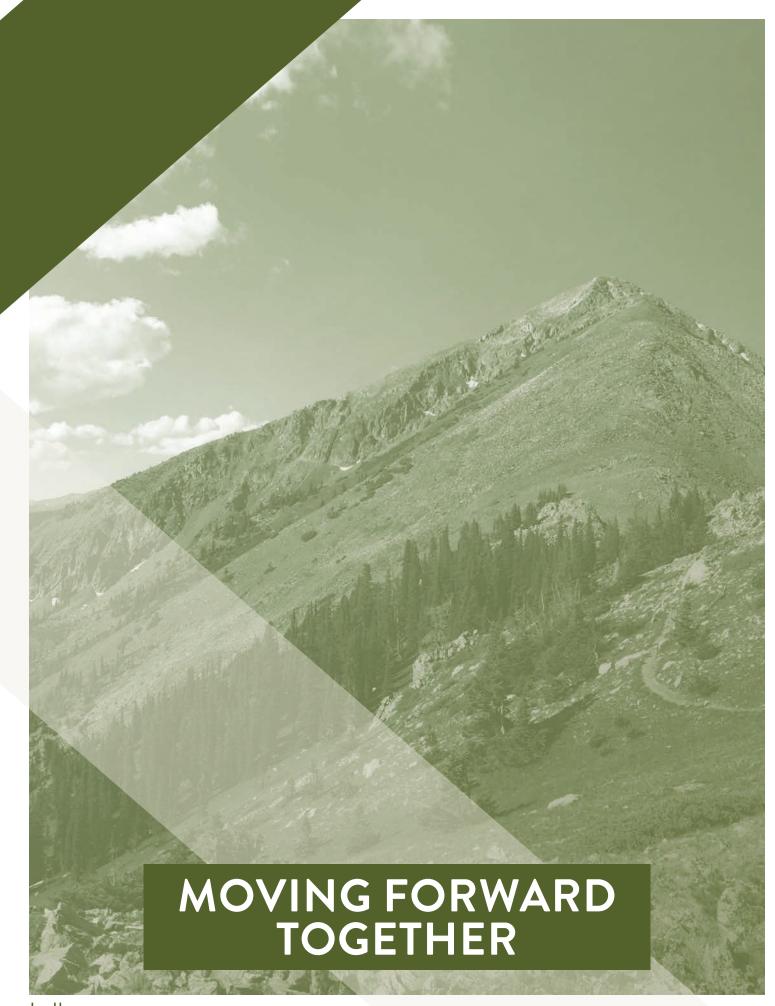

**VISION:** Our communities will inspire residents and visitors to reduce emissions through outreach and leadership.

We believe in a bright, healthy, and sustainable future for Summit County; however, we cannot do it without our community's help. We recognize that this Climate Action Plan will only be impactful if we engage and empower the entire community, including visitors, to be a part of this effort. If successful, the results will be far-reaching, and our community will be:

- · healthier due to less air pollution and congestion, with greater opportunities for safe multimodal travel;
- · more informed and engaged about climate, sustainability, and energy issues;
- · more affordable due to more energy efficient housing and businesses; and
- empowered to create a vibrant and sustainable Summit County for current and future generations.

# COMMUNITY ENGAGEMENT STRATEGIES

- Collaborate with ski areas and local towns to promote the Climate Action Plan and implement strategies
  to educate millions of visitors. We hope that visitors will be inspired to take these strategies and lessons
  learned back to their own communities to further expand the benefits of climate action.
- Create an outreach campaign to engage locals in climate action. Working collaboratively, we will develop an engaging, empowering, and relevant outreach campaign that helps locals understand and participate in these efforts.
- · Provide free workshops to help residents learn how to reduce their carbon footprints.
- Develop programs to engage K-12 and college students on climate change and solutions. We will work
  with the Summit School District, Colorado Mountain College, and other relevant organizations to develop
  programs that educate and engage students of all ages.
- Utilize special events to share messages, provide resources, and engage participants in carbon reduction strategies. We will be an active participant in community and events that occur throughout Summit County in order to engage people, provide resources, and ensure that implementation of our Climate Action Plan is a community effort.

**Hugh Carey** 

# MOVING FORWARD TOGETHER

As a resort community that hosts millions of visitors each year, the Summit Climate Action Collaborative believes it is our responsibility to demonstrate leadership in the fight against climate change. This plan identifies strategies and actions that will lead to significant emissions reductions, ensuring that we do our part to mitigate the most severe effects of climate change. Our Collaborative strongly believes in the ability of our communities to work together to implement the strategies identified in this Climate Action Plan and make our vision of a sustainable Summit County a reality. We look forward to engaging residents, businesses, and visitors in these efforts so that we can create a healthy and sustainable future for all.

Moving forward, HC3 will work with each of the municipalities in Summit County to ensure this plan is adopted and supported within each jurisdiction. Many of the Collaborative members that helped create this plan have agreed to participate in working groups to develop and implement the policies, programs, and initiatives identified in the plan. Each year, the Collaborative will publish a progress report on the Climate Action Plan. Further, HC3 will complete an updated greenhouse gas emissions inventory every three years to determine whether we are on-track to meet our goals.

In Summit County, our way of life is directly tied to the health of our environment. While we recognize the significant effort required to fully implement this Climate Action Plan, we are committed to protecting our mountain community for generations to come.
