Your Comment

To Whom it may concern
Planning File No. 113-20-CU
My wife and I own townhouse unit 687B Meadow Drive that directly overlooks and is to the west of the planned development. We have no objection to the proposed use per se. Our only concern, given that the operating hours will be 6 am to 8 pm is noise or other disturbances emanating from the unit or from groups congregating outside the unit, especially during sleeping hours. The application notes that noise generation inside the unit will be minimal since it will be provided by personal blue tooth speakers. Could we be provided some additional reassurance that the activities associated with the studio will be indeed not cause any undue disturbances?
Yours sincerely,
Ken May

Hi Katie,

There will be no group classes held outside nor will there be loud music playing outside. The previous location I worked at had residential units right above the gym and we never had any complaints regarding noise so it should not be an issue. Additionally, we will not have weight machines so there will be no noise pollution regarding that as well.

Additionally, I would love to schedule a time to talk over the phone about how the meeting is going to go on the 6th. I'm available after 11:30 tomorrow if you have time in the afternoon to chat.

Thanks!
Christie
