

AGENCY CONTACTS FOR PERMITTING

The Building Department requires approval from other agencies as part of issuing Permits and Certificates of Occupancy.

When an application and plans are turned in and the plan review fees are paid, the Building Department will assign, online in CommunityCore, all Agencies having jurisdiction that are required to approve various stages of the project. *It is the responsibility of the project owner or contractor of record to contact those agencies* (obtaining online approval/“sign-off”). Approvals from these agencies may require the project owner to submit plans, obtain separate permits, and pay additional fees at each agency.

These approvals may include:

- **Frisco Planning Department**: Planning and Zoning Reviews. (970-668-5276)
- **Frisco Public Works Department**: Water Tap Fees, Excavation permits, water service line approvals. Note: Residential Exterior Changes, Remodels, and Additions might mean the relocation of your **Meter Transceiver Unit (MXU)**, aka water meter box. This cream colored 5”x4” box will cost you if thrown away during any exterior remodeling. Please discuss with your contractor the location and wiring for this box in the framing process of any new construction or exterior work. (970-668-9153)
- **Frisco Sanitation District**: Sewer Tap fee review and approval (970-668-3723)
- **Summit Fire & EMS**: Reviews for fire safety. Most Building permits require review and approval from Summit Fire & EMS and some will require permits through Summit Fire & EMS, i.e., Decks, Additions, New Residential, Commercial. Be prepared by referencing the following document to know if a fire permit is required: **Summit Fire Permit Process for Applicant** or you may contact Summit Fire & EMS at 970-262-5100, option 2 (summitfire.colorado.gov/services/permits) to determine what is needed by them or to obtain approval.
- **Summit County Environmental Health Department**: Food Service approvals. (970-668-4073)
- **Northwest Colorado Council of Governments (NWCCOG)**: Administers elevator permits, inspections, and certificates of inspections. (970-468-0295, <https://www.nwccog.org/>)

Thank you,
Town of Frisco Building Department
