Subject: Opposition to Proposed 75-Foot Cell Tower Special Use Permit at 101 W. Main Street

Dear Members of the Planning Commission,

I am writing to express my strong opposition to AT&T's application for a new 75-foot wireless telecommunications facility (monopine) and accompanying height variance at 101 W. Main Street.

Key Concerns with the Proposed Location

Excessive Height and Visual Impact: The proposed 75-foot structure requires a 25.5-foot variance above the standard 49.5-foot height limit for this Planned Unit Development (PUD). According to the carrier's application, this extra height is specifically intended to extend the antennas above the natural tree canopy. Consequently, the tower will loom over surrounding trees and become an unavoidable, jarring eyesore in a residential neighborhood.

Incompatible Placement on Main Street: Main Street serves as a primary gateway for residents, visitors, and tourists. While the tower is proposed to be disguised as a faux pine tree, these artificial structures rarely blend in and instead stand out as unnatural industrial intrusions. Approving one of the tallest commercial structures in the area right on Main Street contradicts the community's vision for a quaint, pedestrian-friendly corridor. Placing a massive industrial tower on Main Street completely contradicts our historic identity as the "Main Street to the Rockies" and degrades the view for residents and tourists alike.

Better Alternatives Exist: Frisco has historically prioritized thoughtful urban planning, keeping major commercial operations concentrated along designated corridors rather than residential creeksides. More appropriate, less intrusive locations are available for this infrastructure without sacrificing neighborhood aesthetics and property values.

Call to Action

We urge the Planning Commission to deny the requested height variance and reject the placement of this oversized tower in a residential and scenic corridor.

I affirm that I am a real human submitting this form with feedback or questions for the Town of Frisco. We get a lot of spam, so thank you for your patience.
